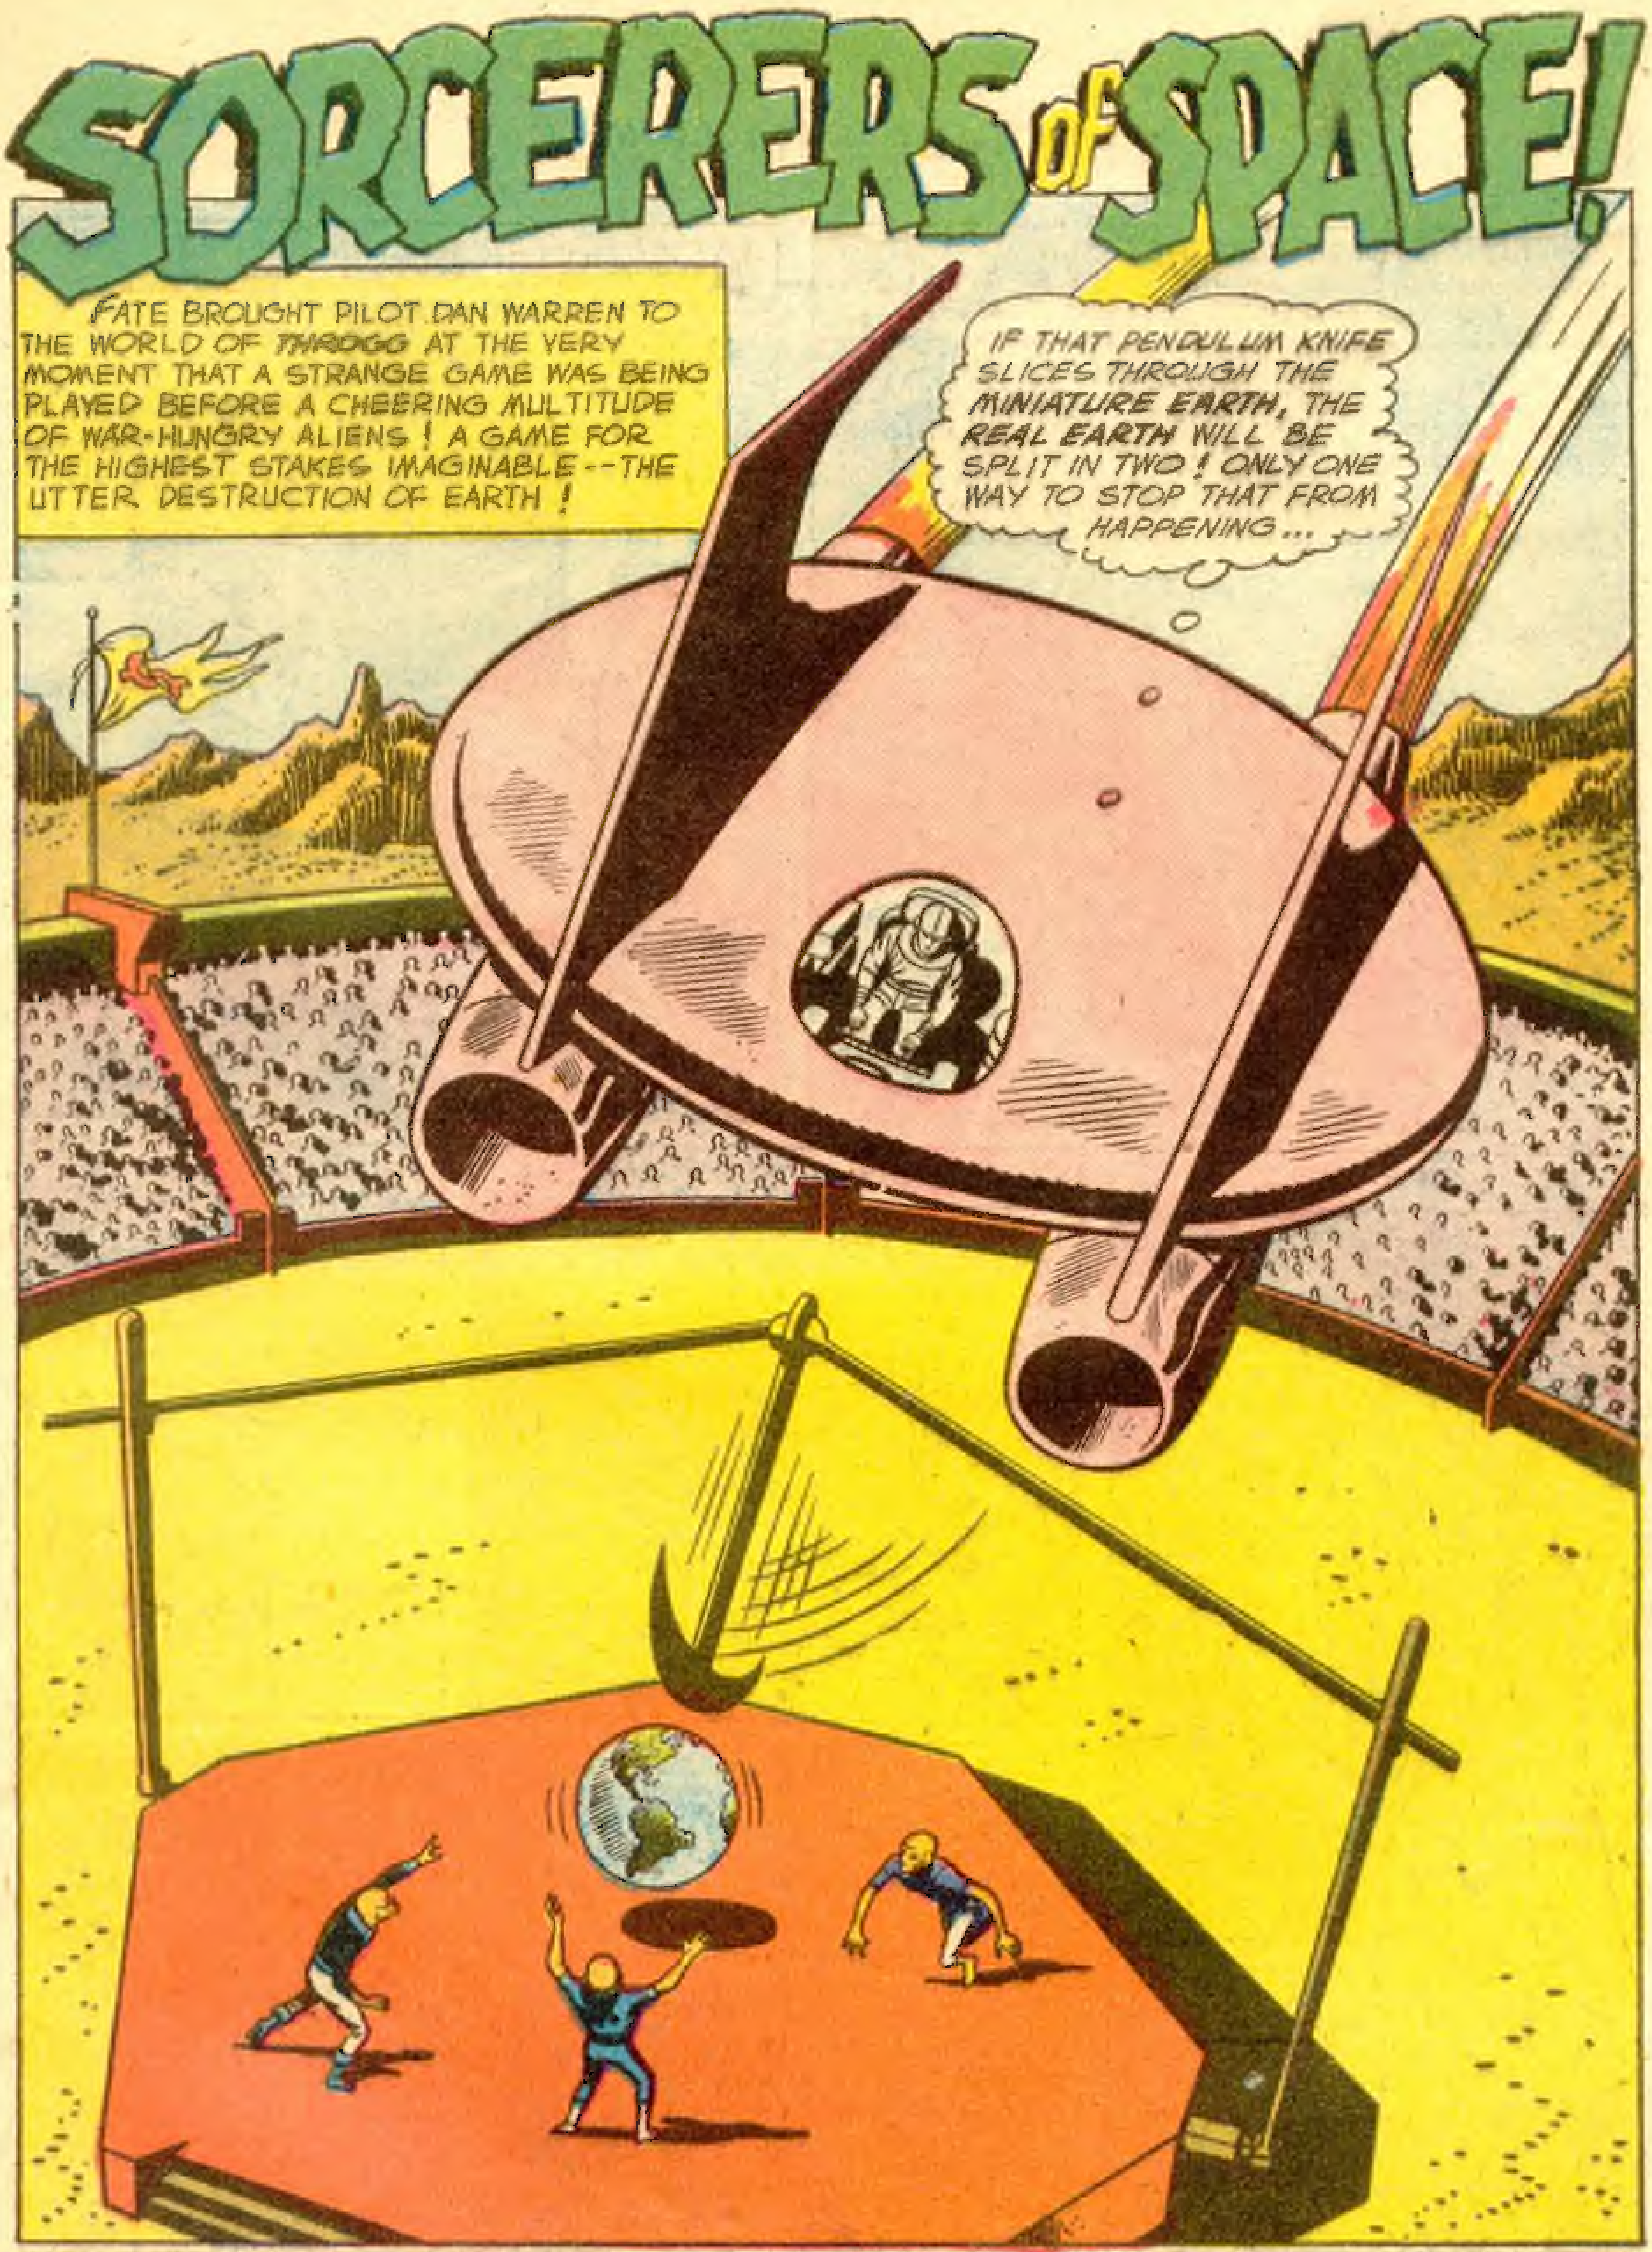
SORCERERS OF SPACE!



FATE BROUGHT PILOT DAN WARREN TO THE WORLD OF THROGG AT THE VERY MOMENT THAT A STRANGE GAME WAS BEING PLAYED BEFORE A CHEERING MULTITUDE OF WAR-HUNGRY ALIENS! A GAME FOR THE HIGHEST STAKES IMAGINABLE--THE UTTER DESTRUCTION OF EARTH!
IF THAT PENDULUM KNIFE SLICES THROUGH THE MINIATURE EARTH, THE REAL EARTH WILL BE SPLIT IN TWO! ONLY ONE WAY TO STOP THAT FROM HAPPENING...

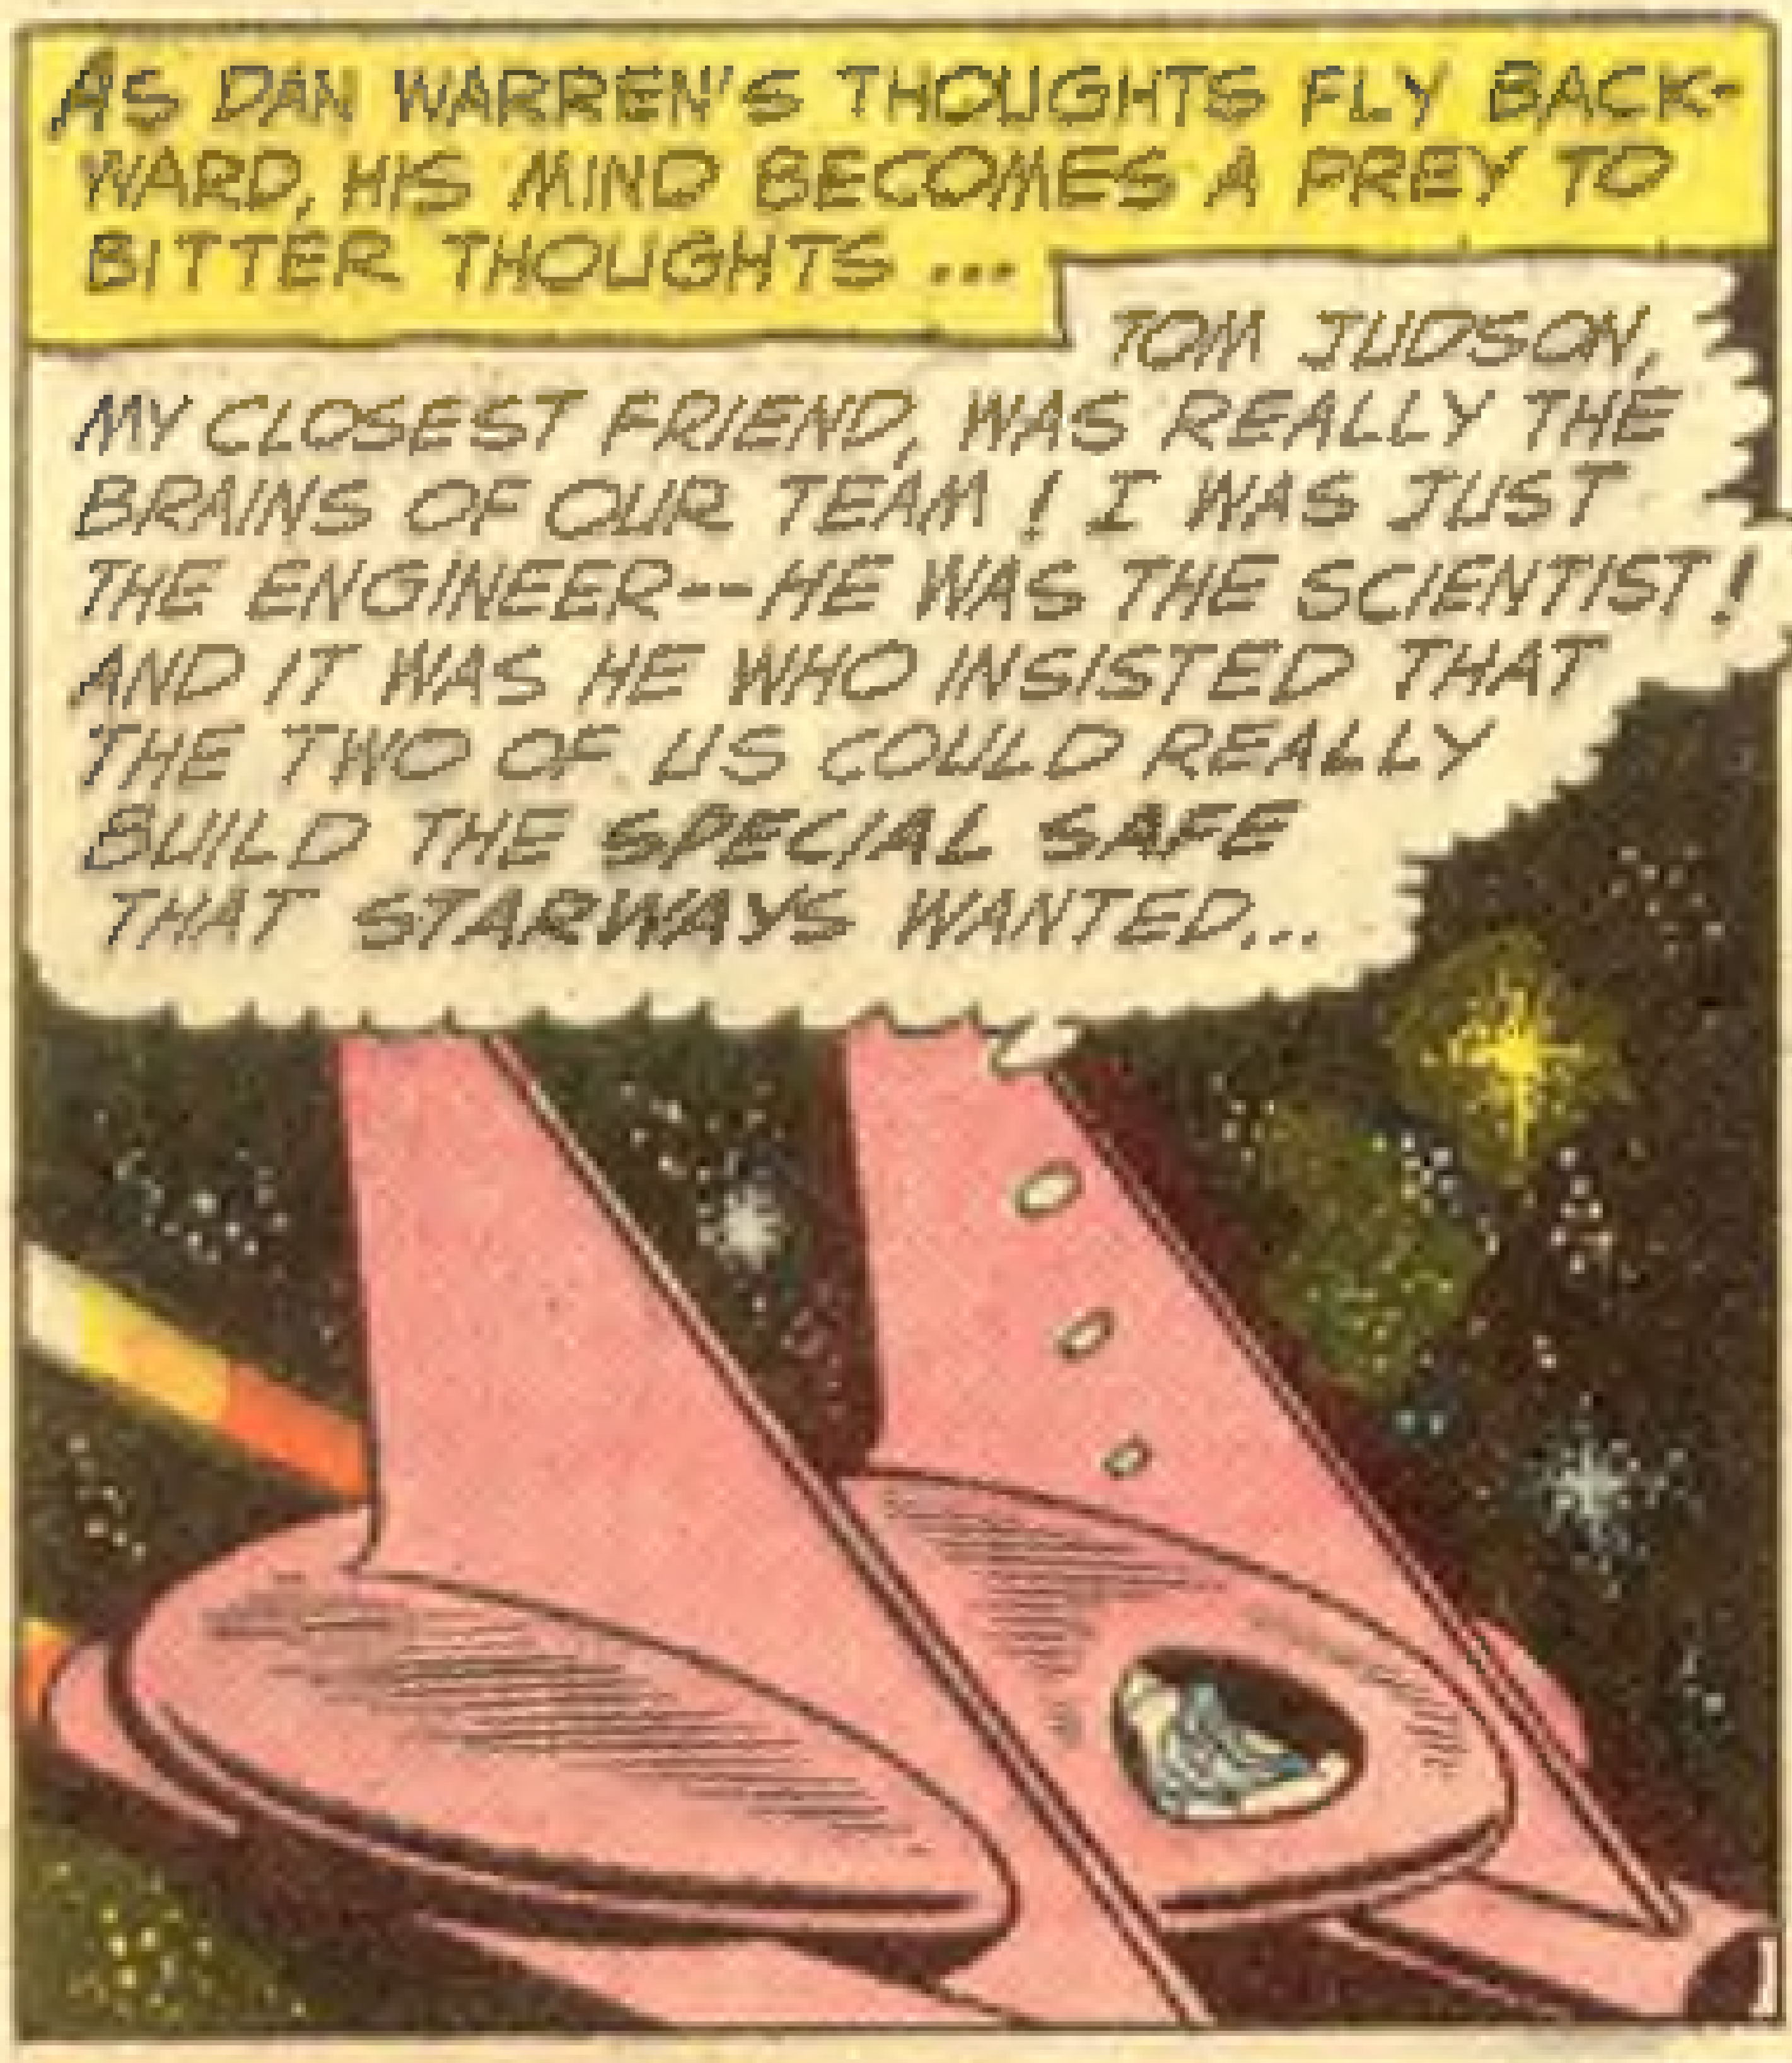
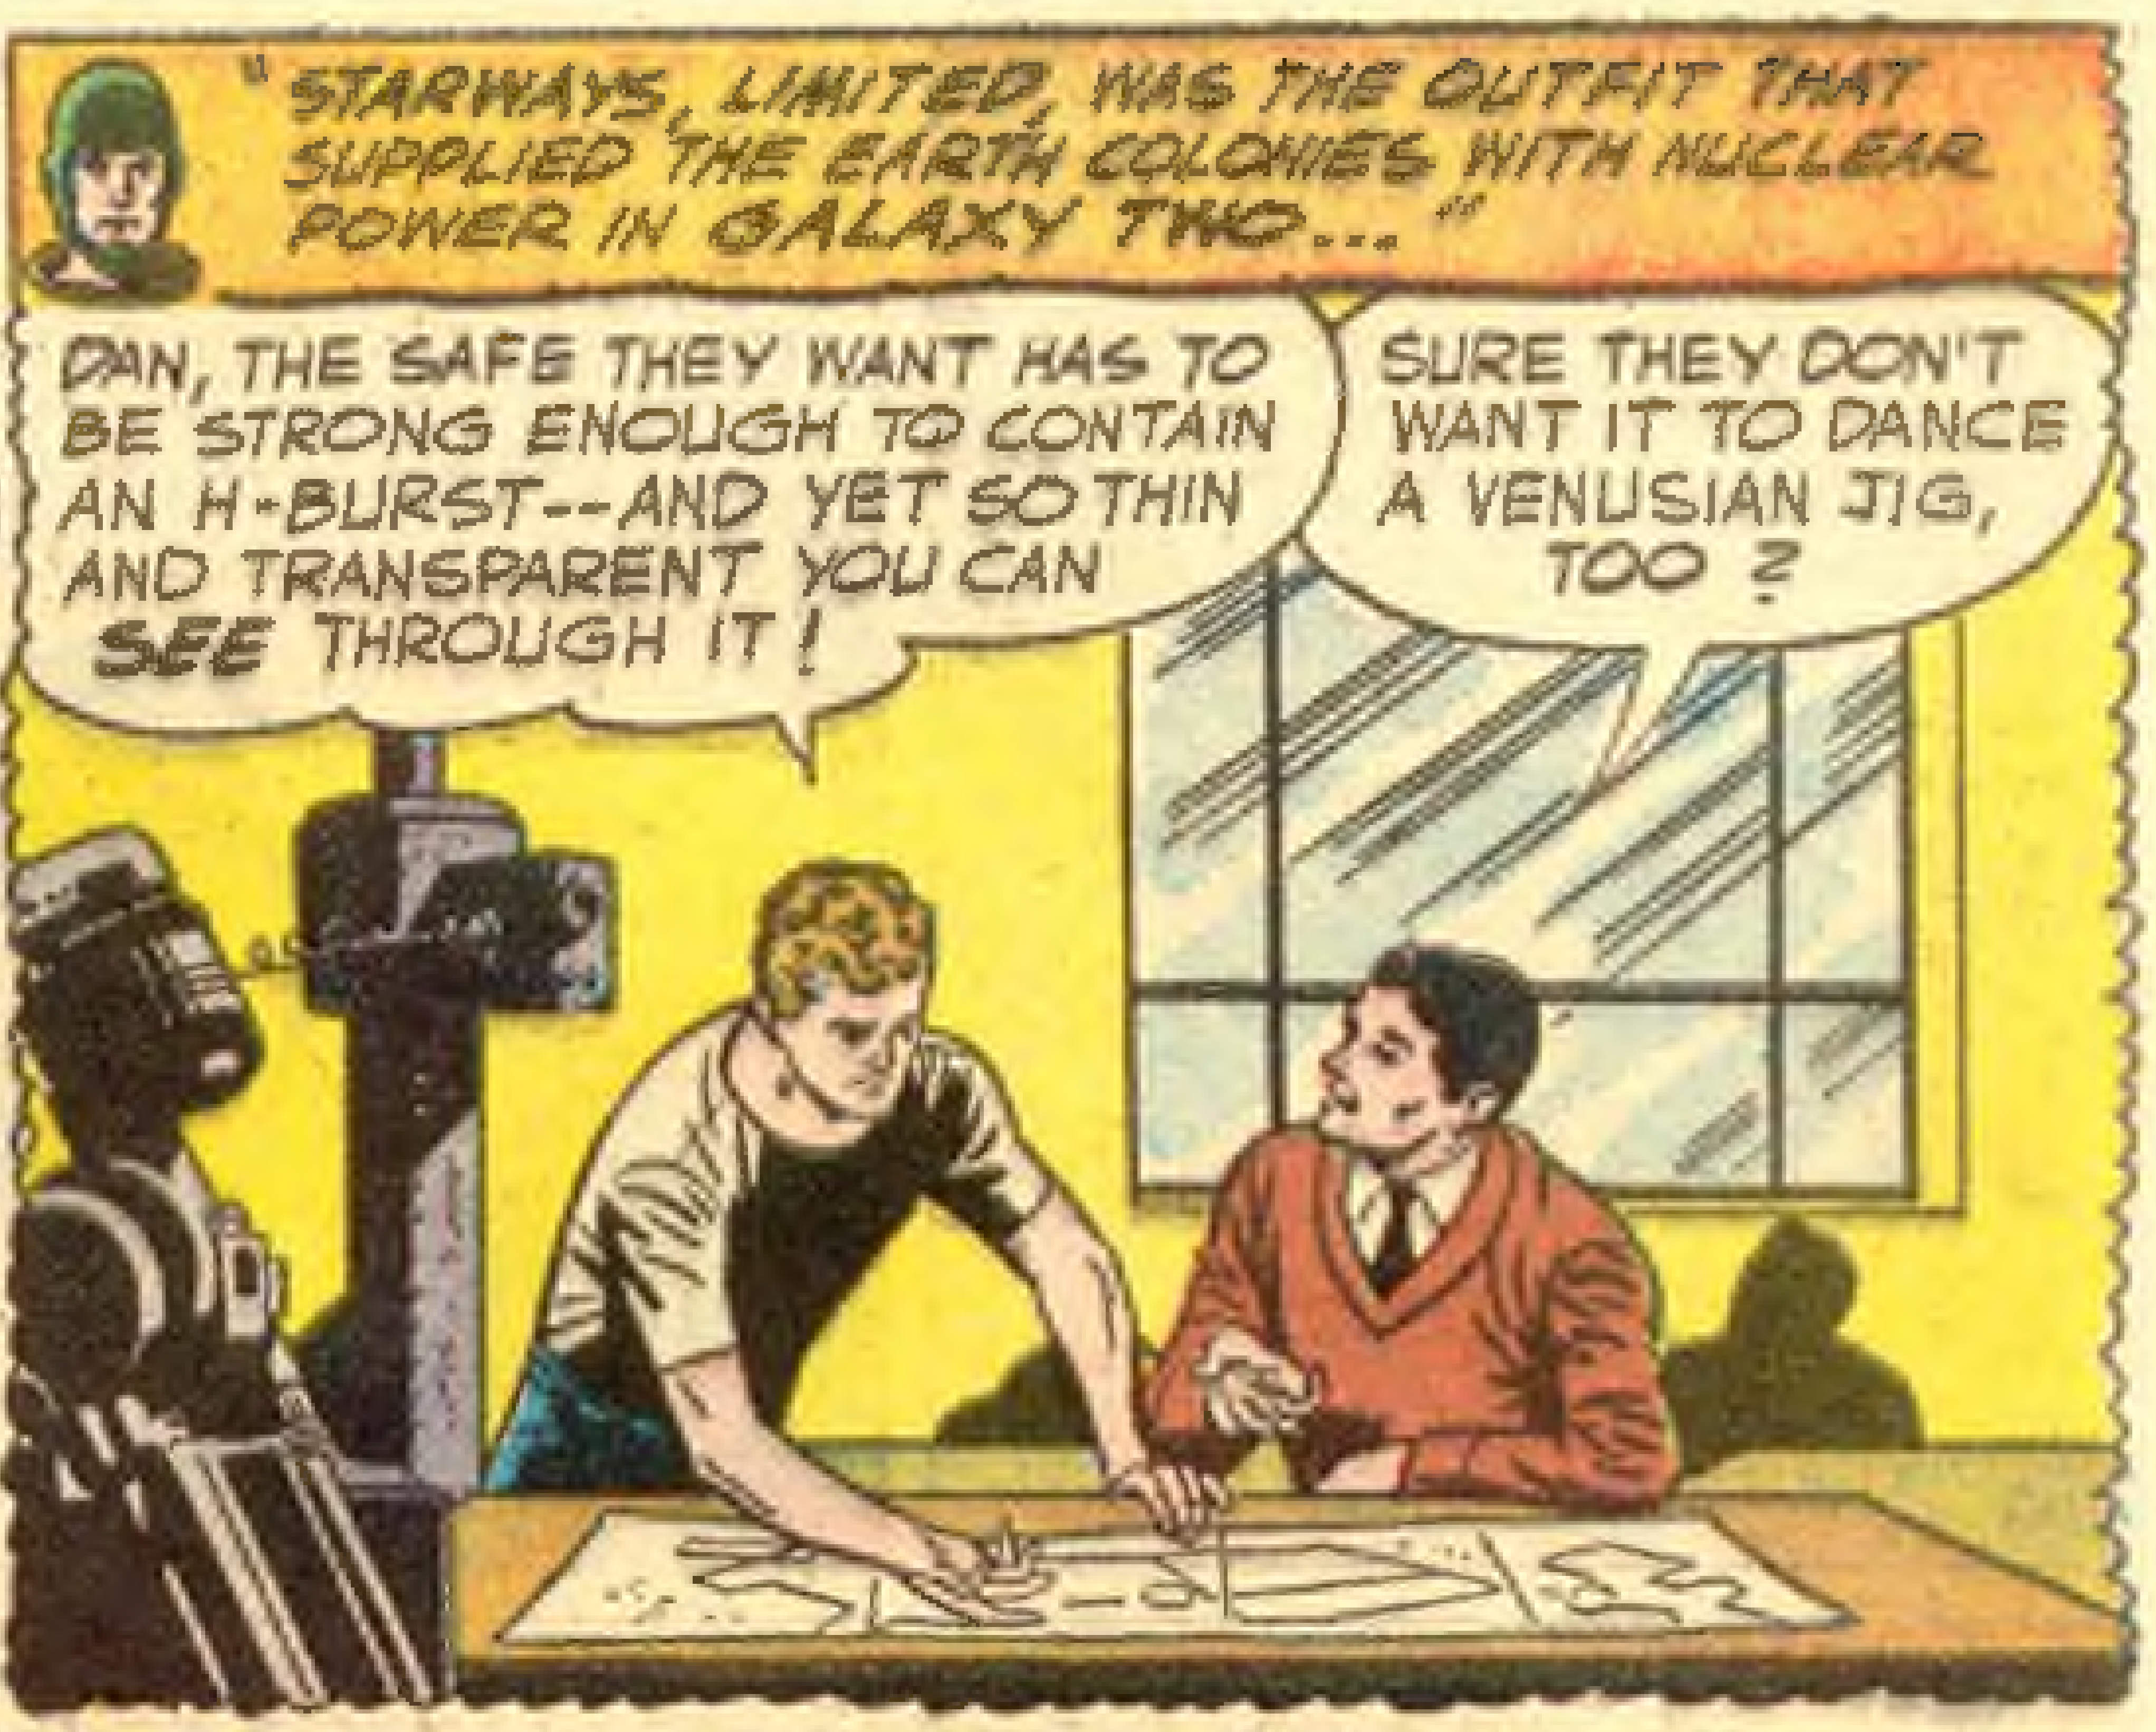
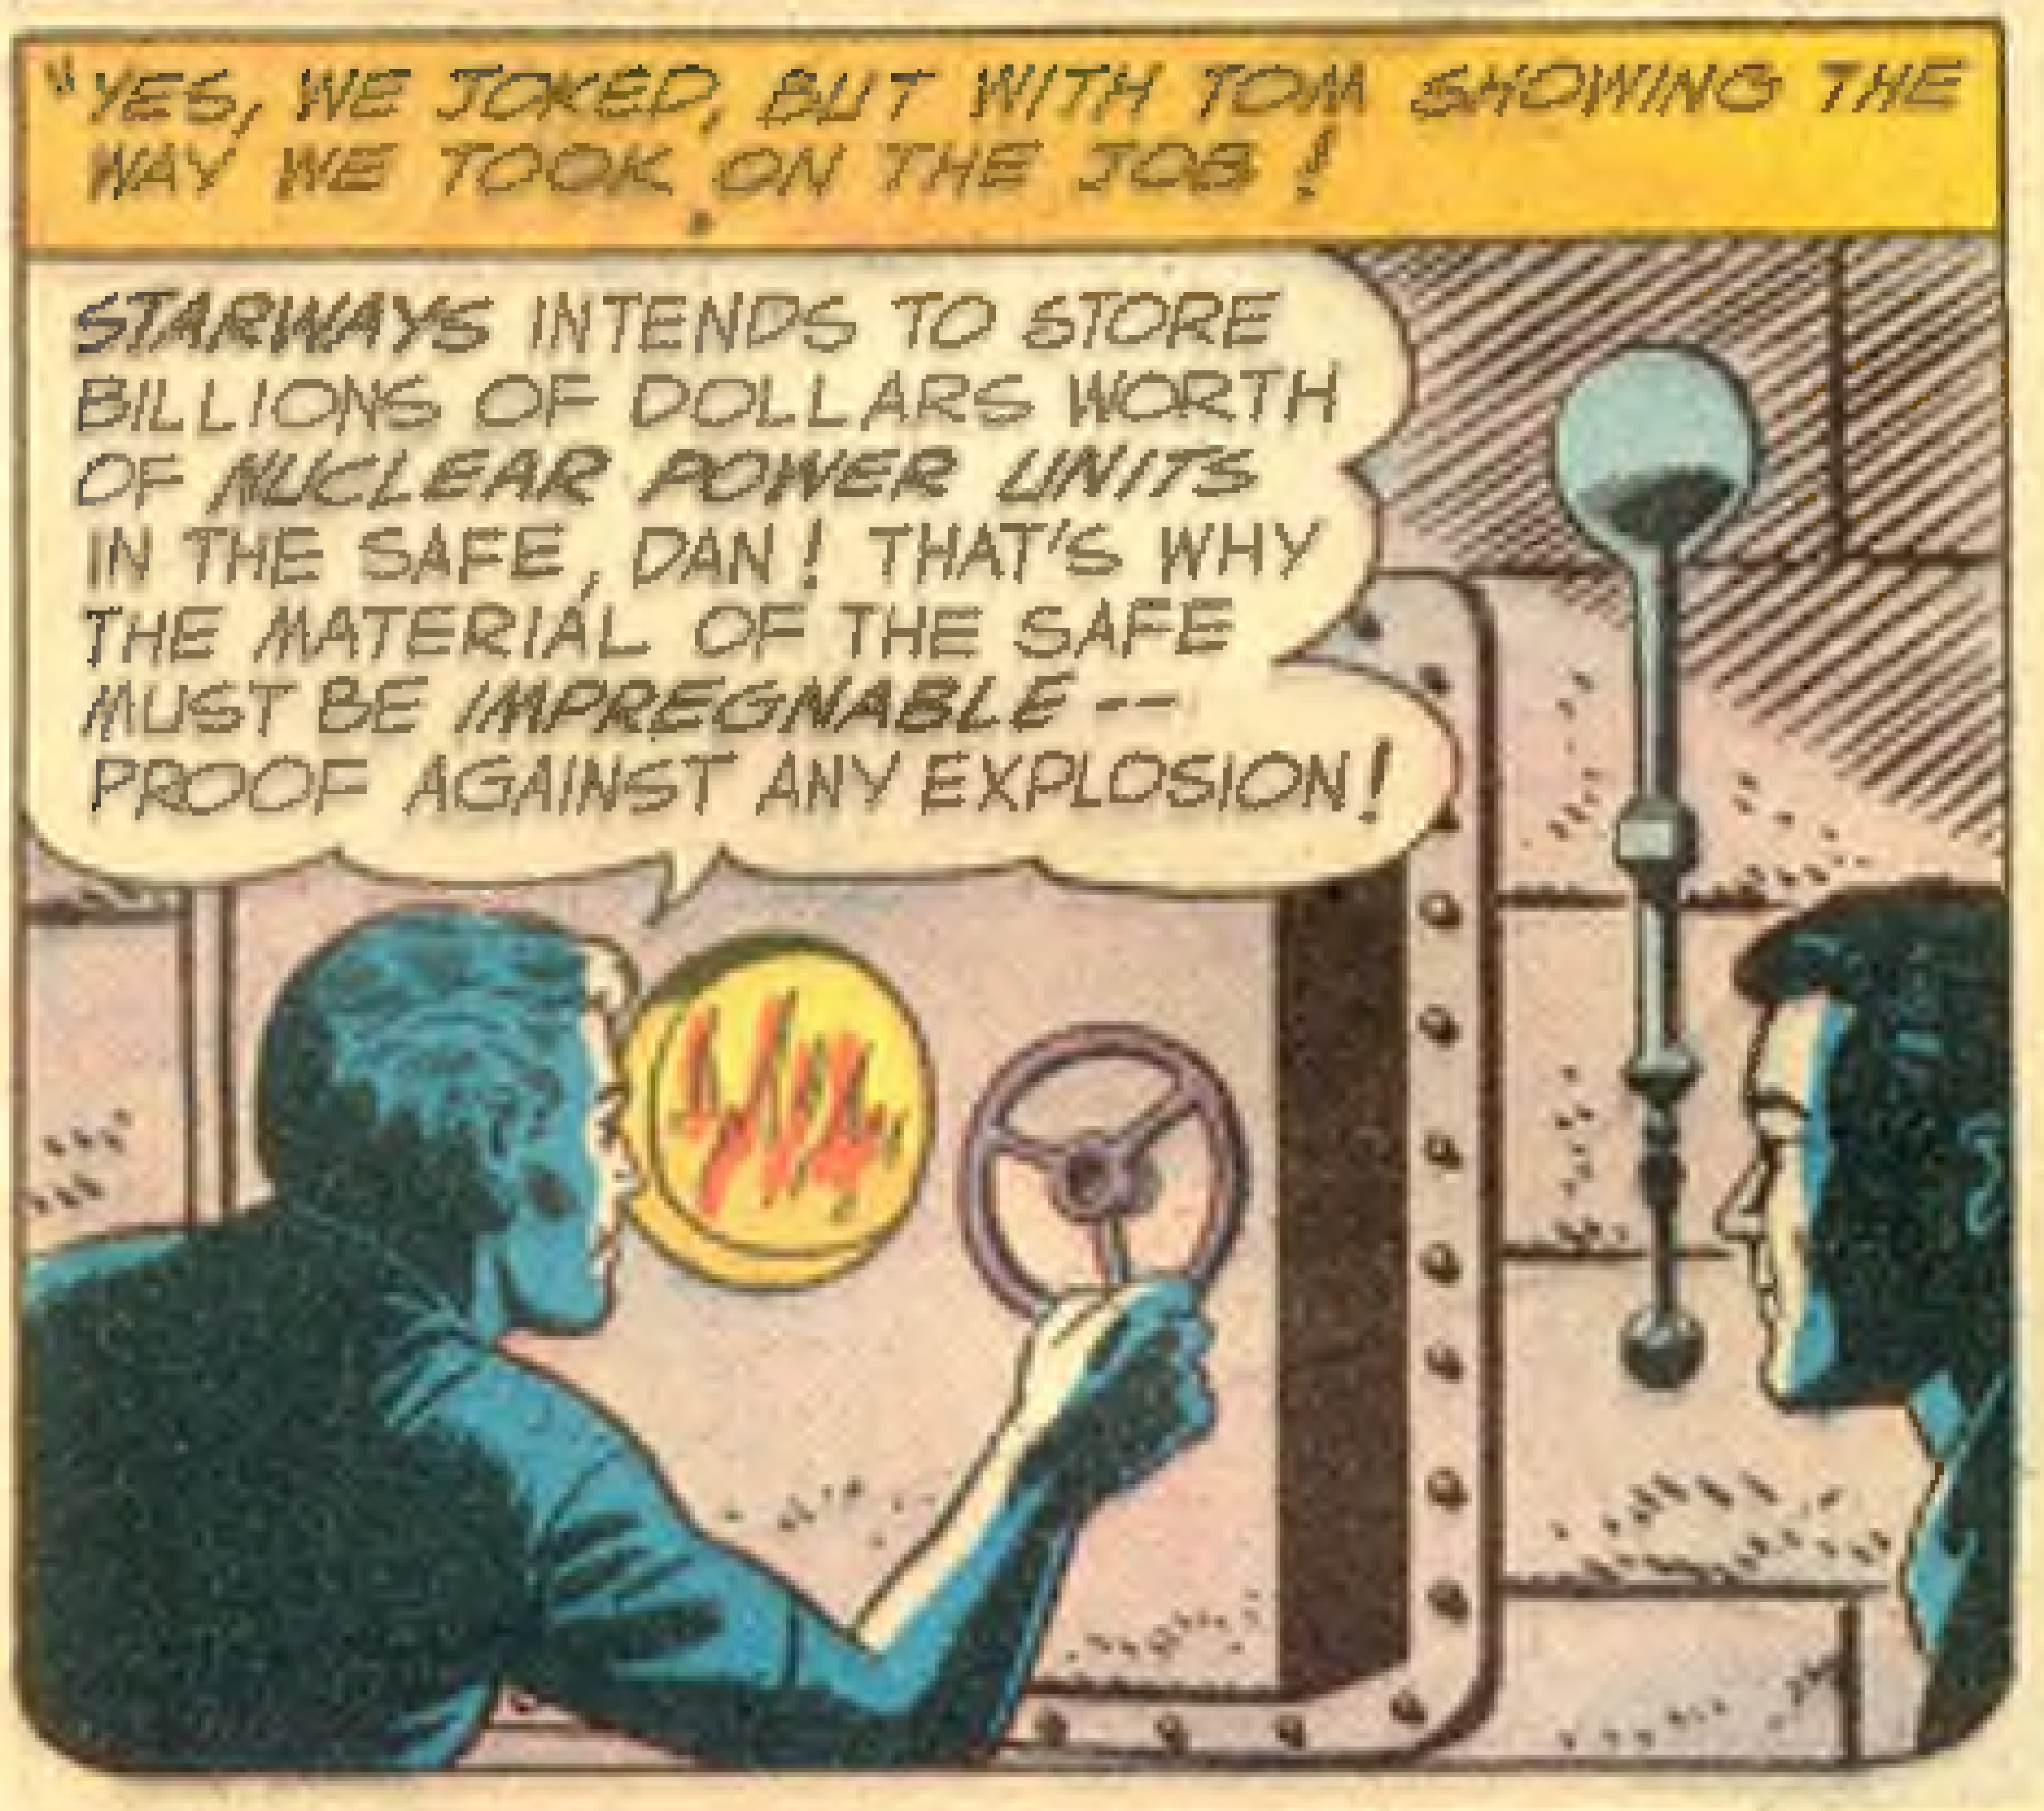
ALTHOUGH NO ONE ON EARTH REALIZED IT AT THE TIME, JULY 10, 2130 MARKED THE BEGINNING OF A STRANGE INVASION OF OUR PLANET...
A GIGANTIC SWORD--OUT OF NOWHERE--RIPPING UP THE STREET!
AT THAT MOMENT, MILLIONS OF MILES AWAY ON THE PLANET THROGG...
THE "SWORD" WORKS, ALGRO! PERFECTLY!
GOOD! NOW I WILL TRY HEAT!
SOON, ON EARTH...
FIRE!
RUN FOR YOUR LIVES! THE WHOLE BUILDING IS IN FLAMES!
ON THROGG AT THIS INSTANT...
IT WORKS AGAIN, ALGRO!
EXCELLENT! OUR THEORETICAL STUDIES HAVE AT LAST PUT EARTH AT OUR MERCY!
BEFORE ANOTHER EARTH HOUR HAS PASSED, WE WILL HAVE UTTERLY DESTROYED LIFE ON THE PLANET--AND PLUNDERED ITS MINERAL WEALTH! MAKE EVERYTHING READY!
IN SPACE, A LONE PILOT RELAXES IN STAR-GEAR AS HIS VESSEL SCOOTS PAST NEBULAE...
I'LL BE GLAD WHEN I REACH MY DESTINATION AND GET RID OF THAT SAFE! IT TOOK TOM JUDSON AND ME FIVE YEARS TO BUILD IT, BUT I HATE IT--IT KILLED TOM!



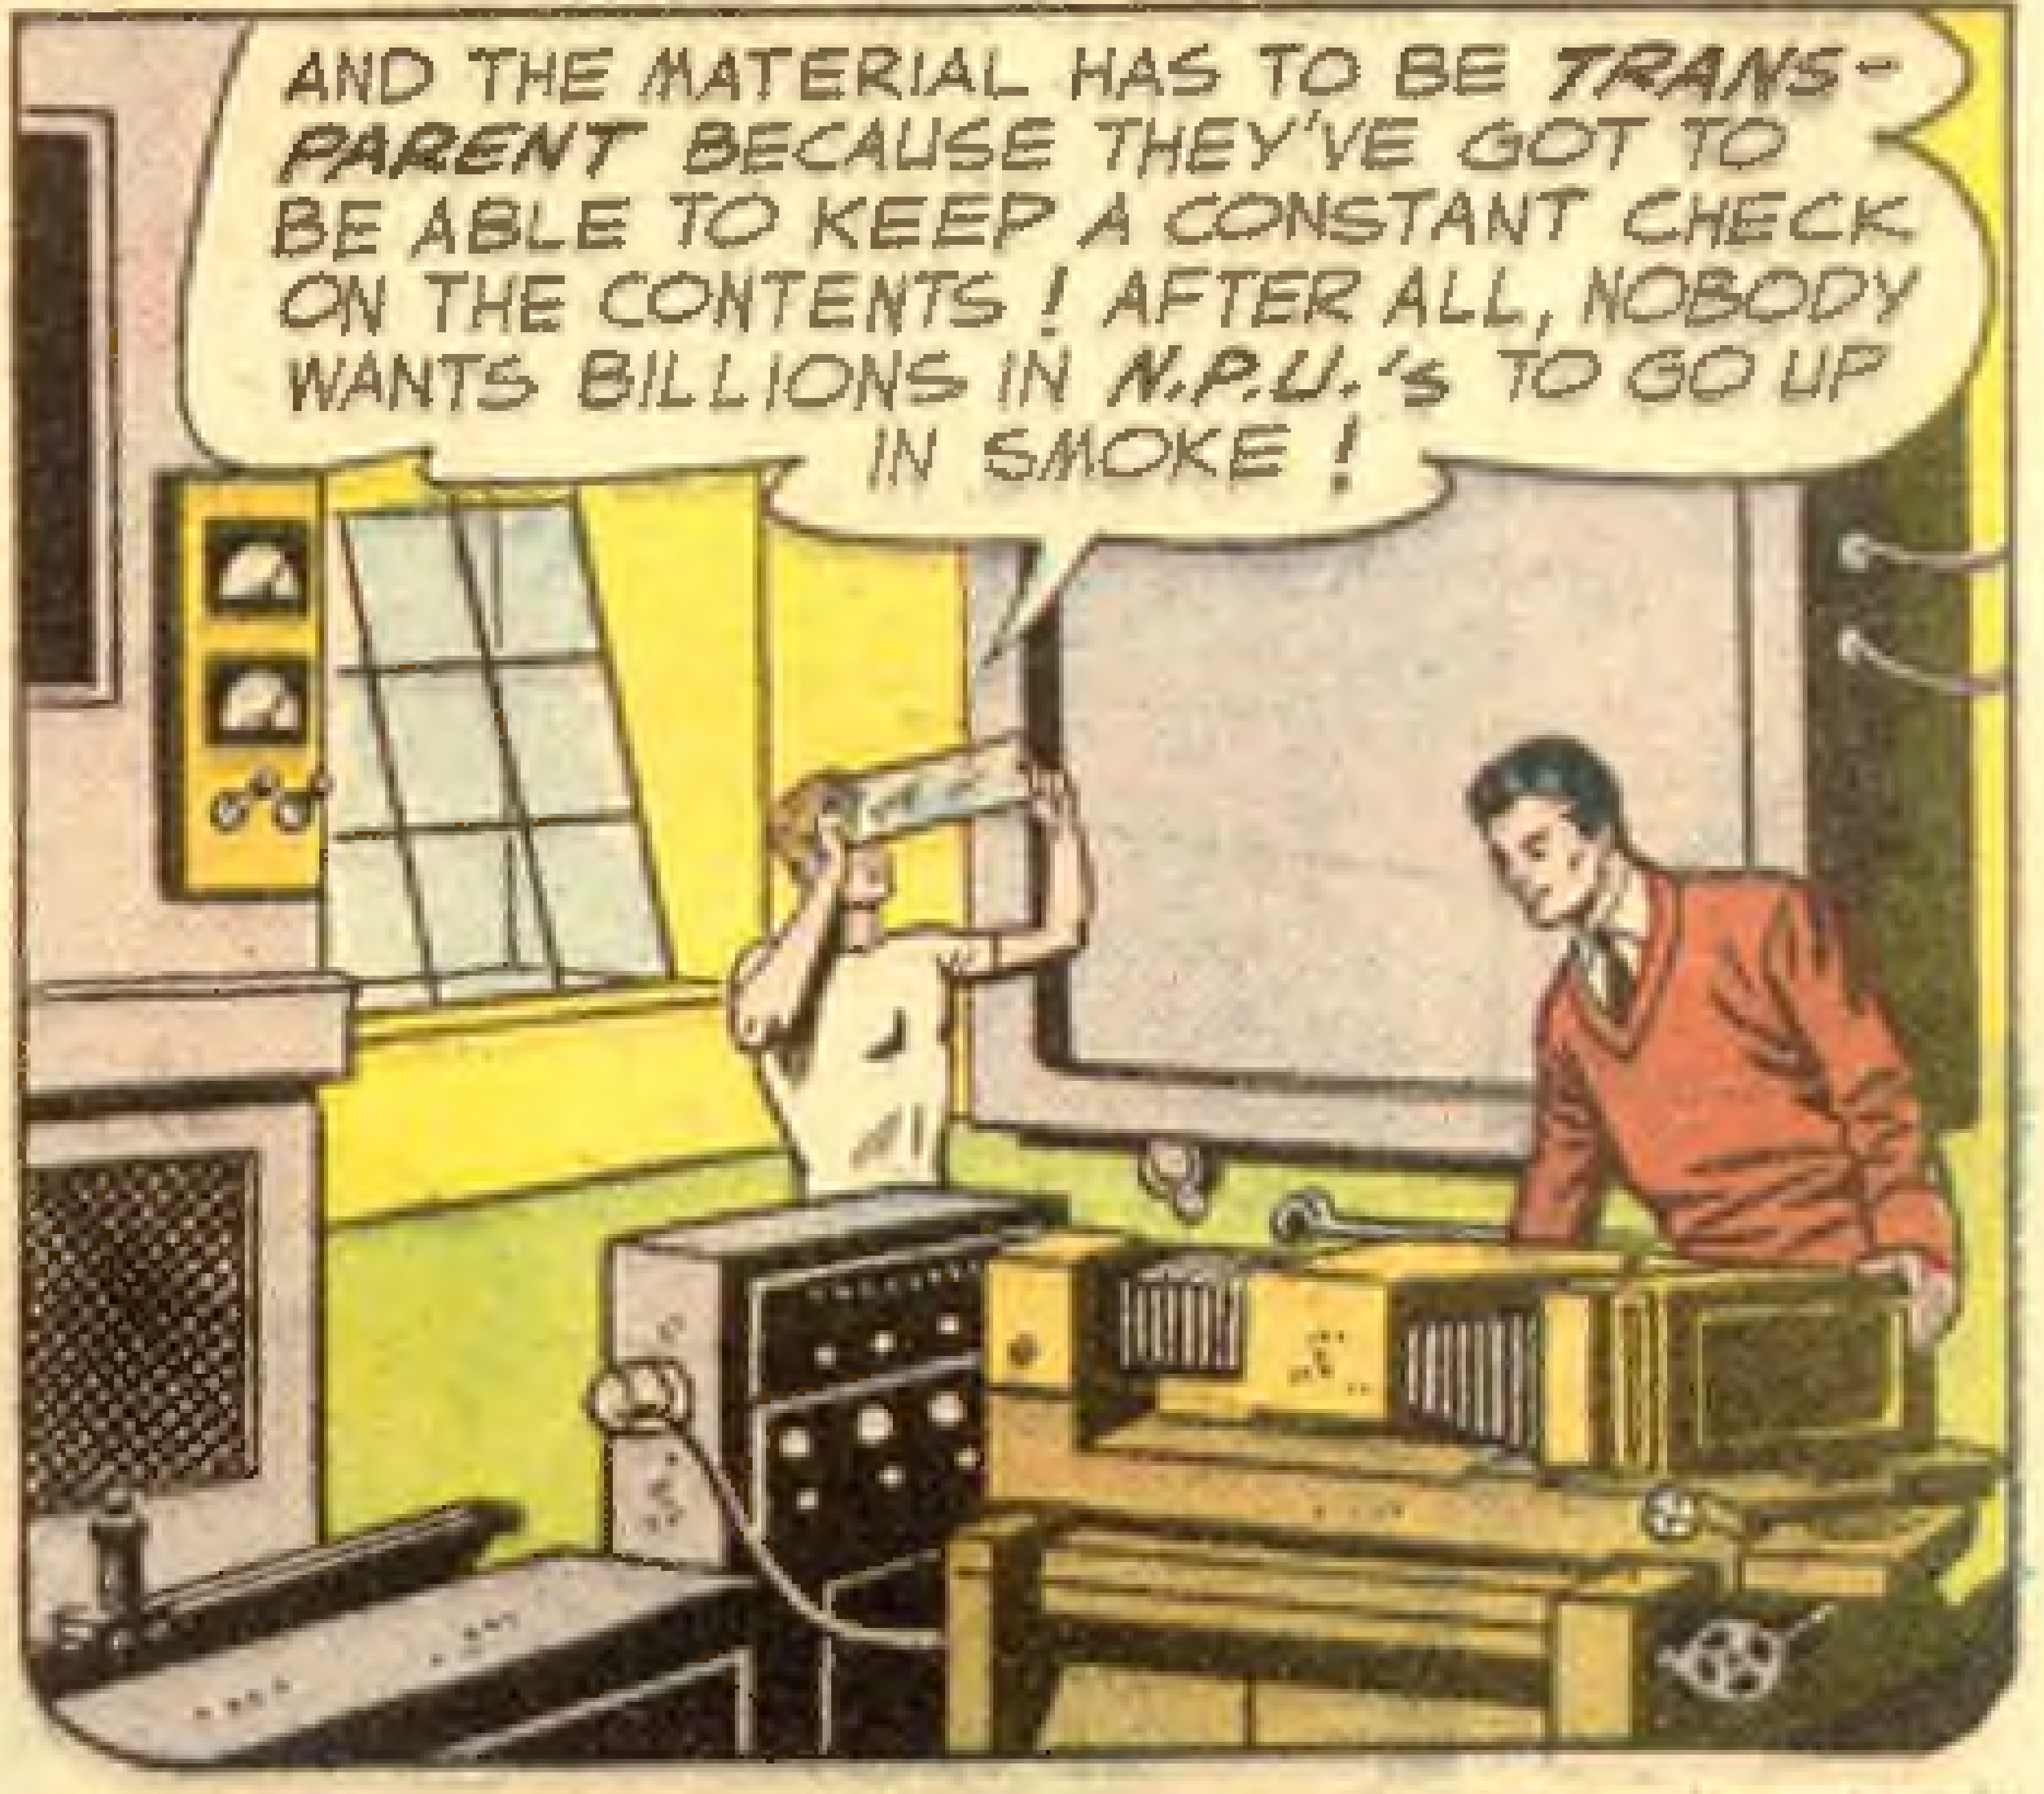
AS DAN WARREN'S THOUGHTS FLY BACKWARD, HIS MIND BECOMES A PREY TO BITTER THOUGHTS ...
TOM JUDSON, MY CLOSEST FRIEND, WAS REALLY THE BRAINS OF OUR TEAM ! I WAS JUST THE ENGINEER--HE WAS THE SCIENTIST! AND IT WAS HE WHO INSISTED THAT THE TWO OF US COULD REALLY BUILD THE SPECIAL SAFE THAT STARWAYS WANTED...



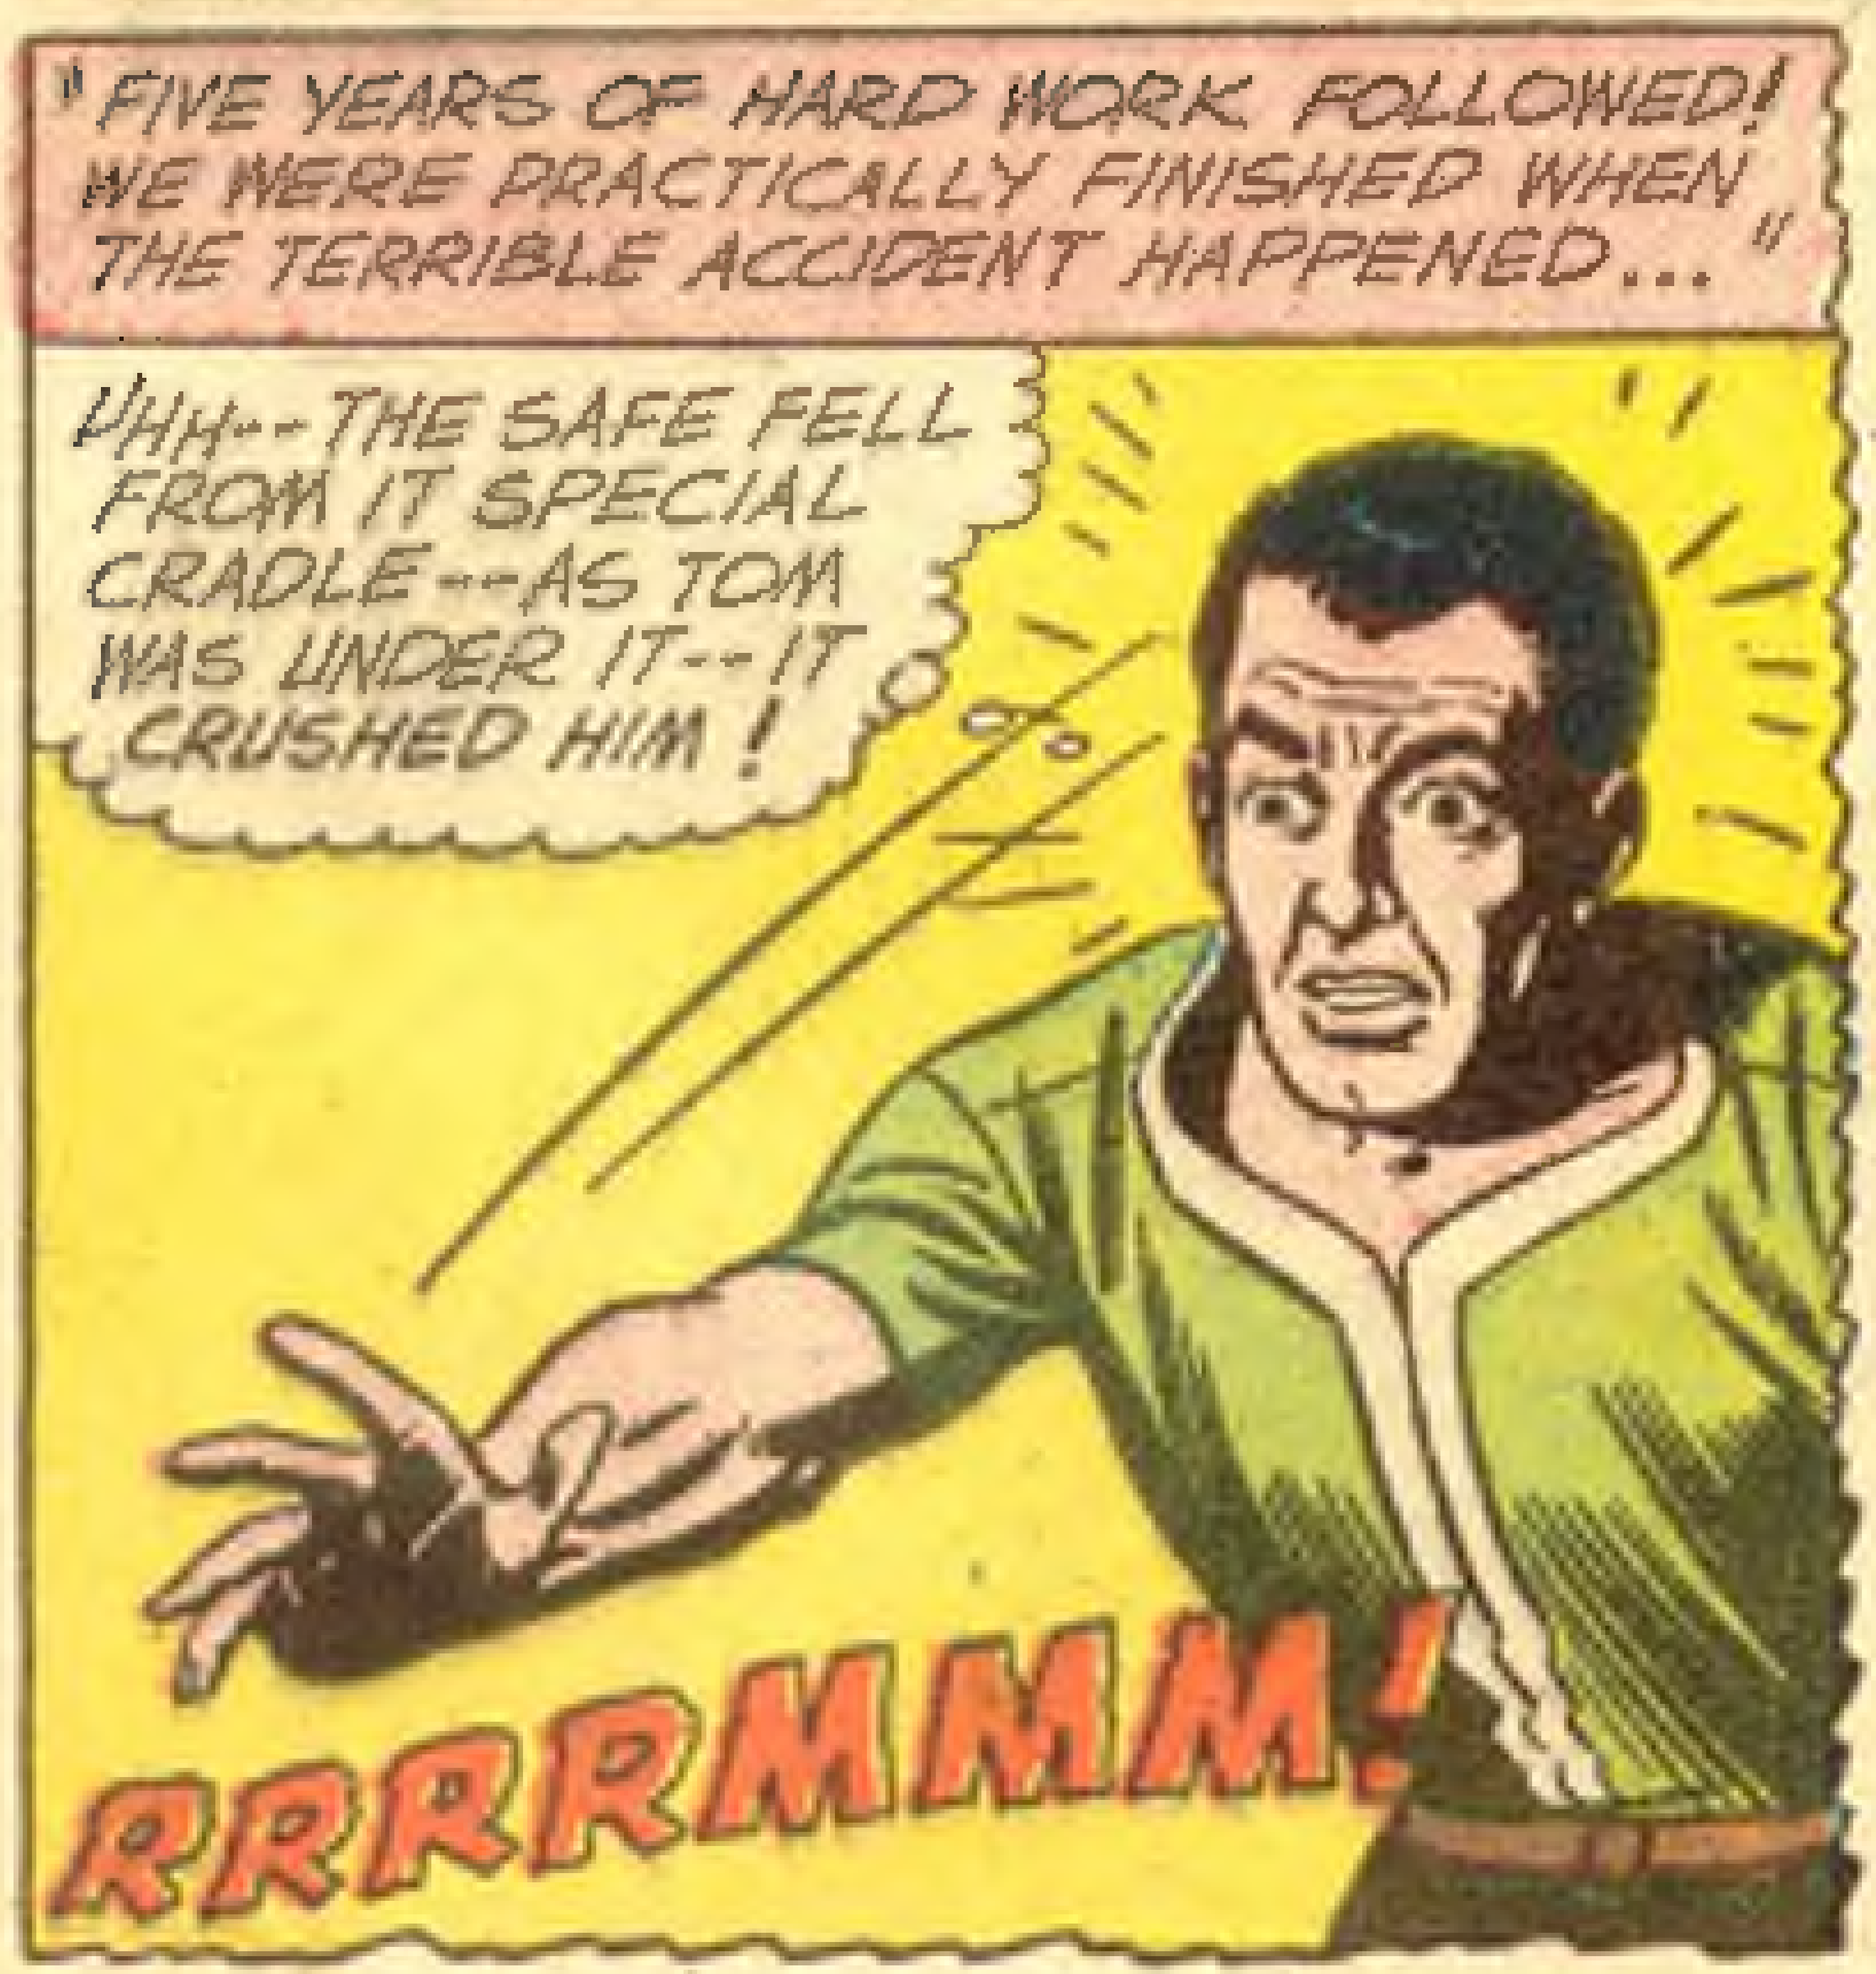
"STARWAYS, LIMITED, WAS THE OUTFIT THAT SUPPLIED THE EARTH COLONIES WITH NUCLEAR POWER IN GALAXY TWO..."
DAN, THE SAFE THEY WANT HAS TO BE STRONG ENOUGH TO CONTAIN AN H-BURST--AND YET SO THIN AND TRANSPARENT YOU CAN SEE THROUGH IT!
SURE THEY DON'T WANT IT TO DANCE A VENUSIAN JIG, TOO ?



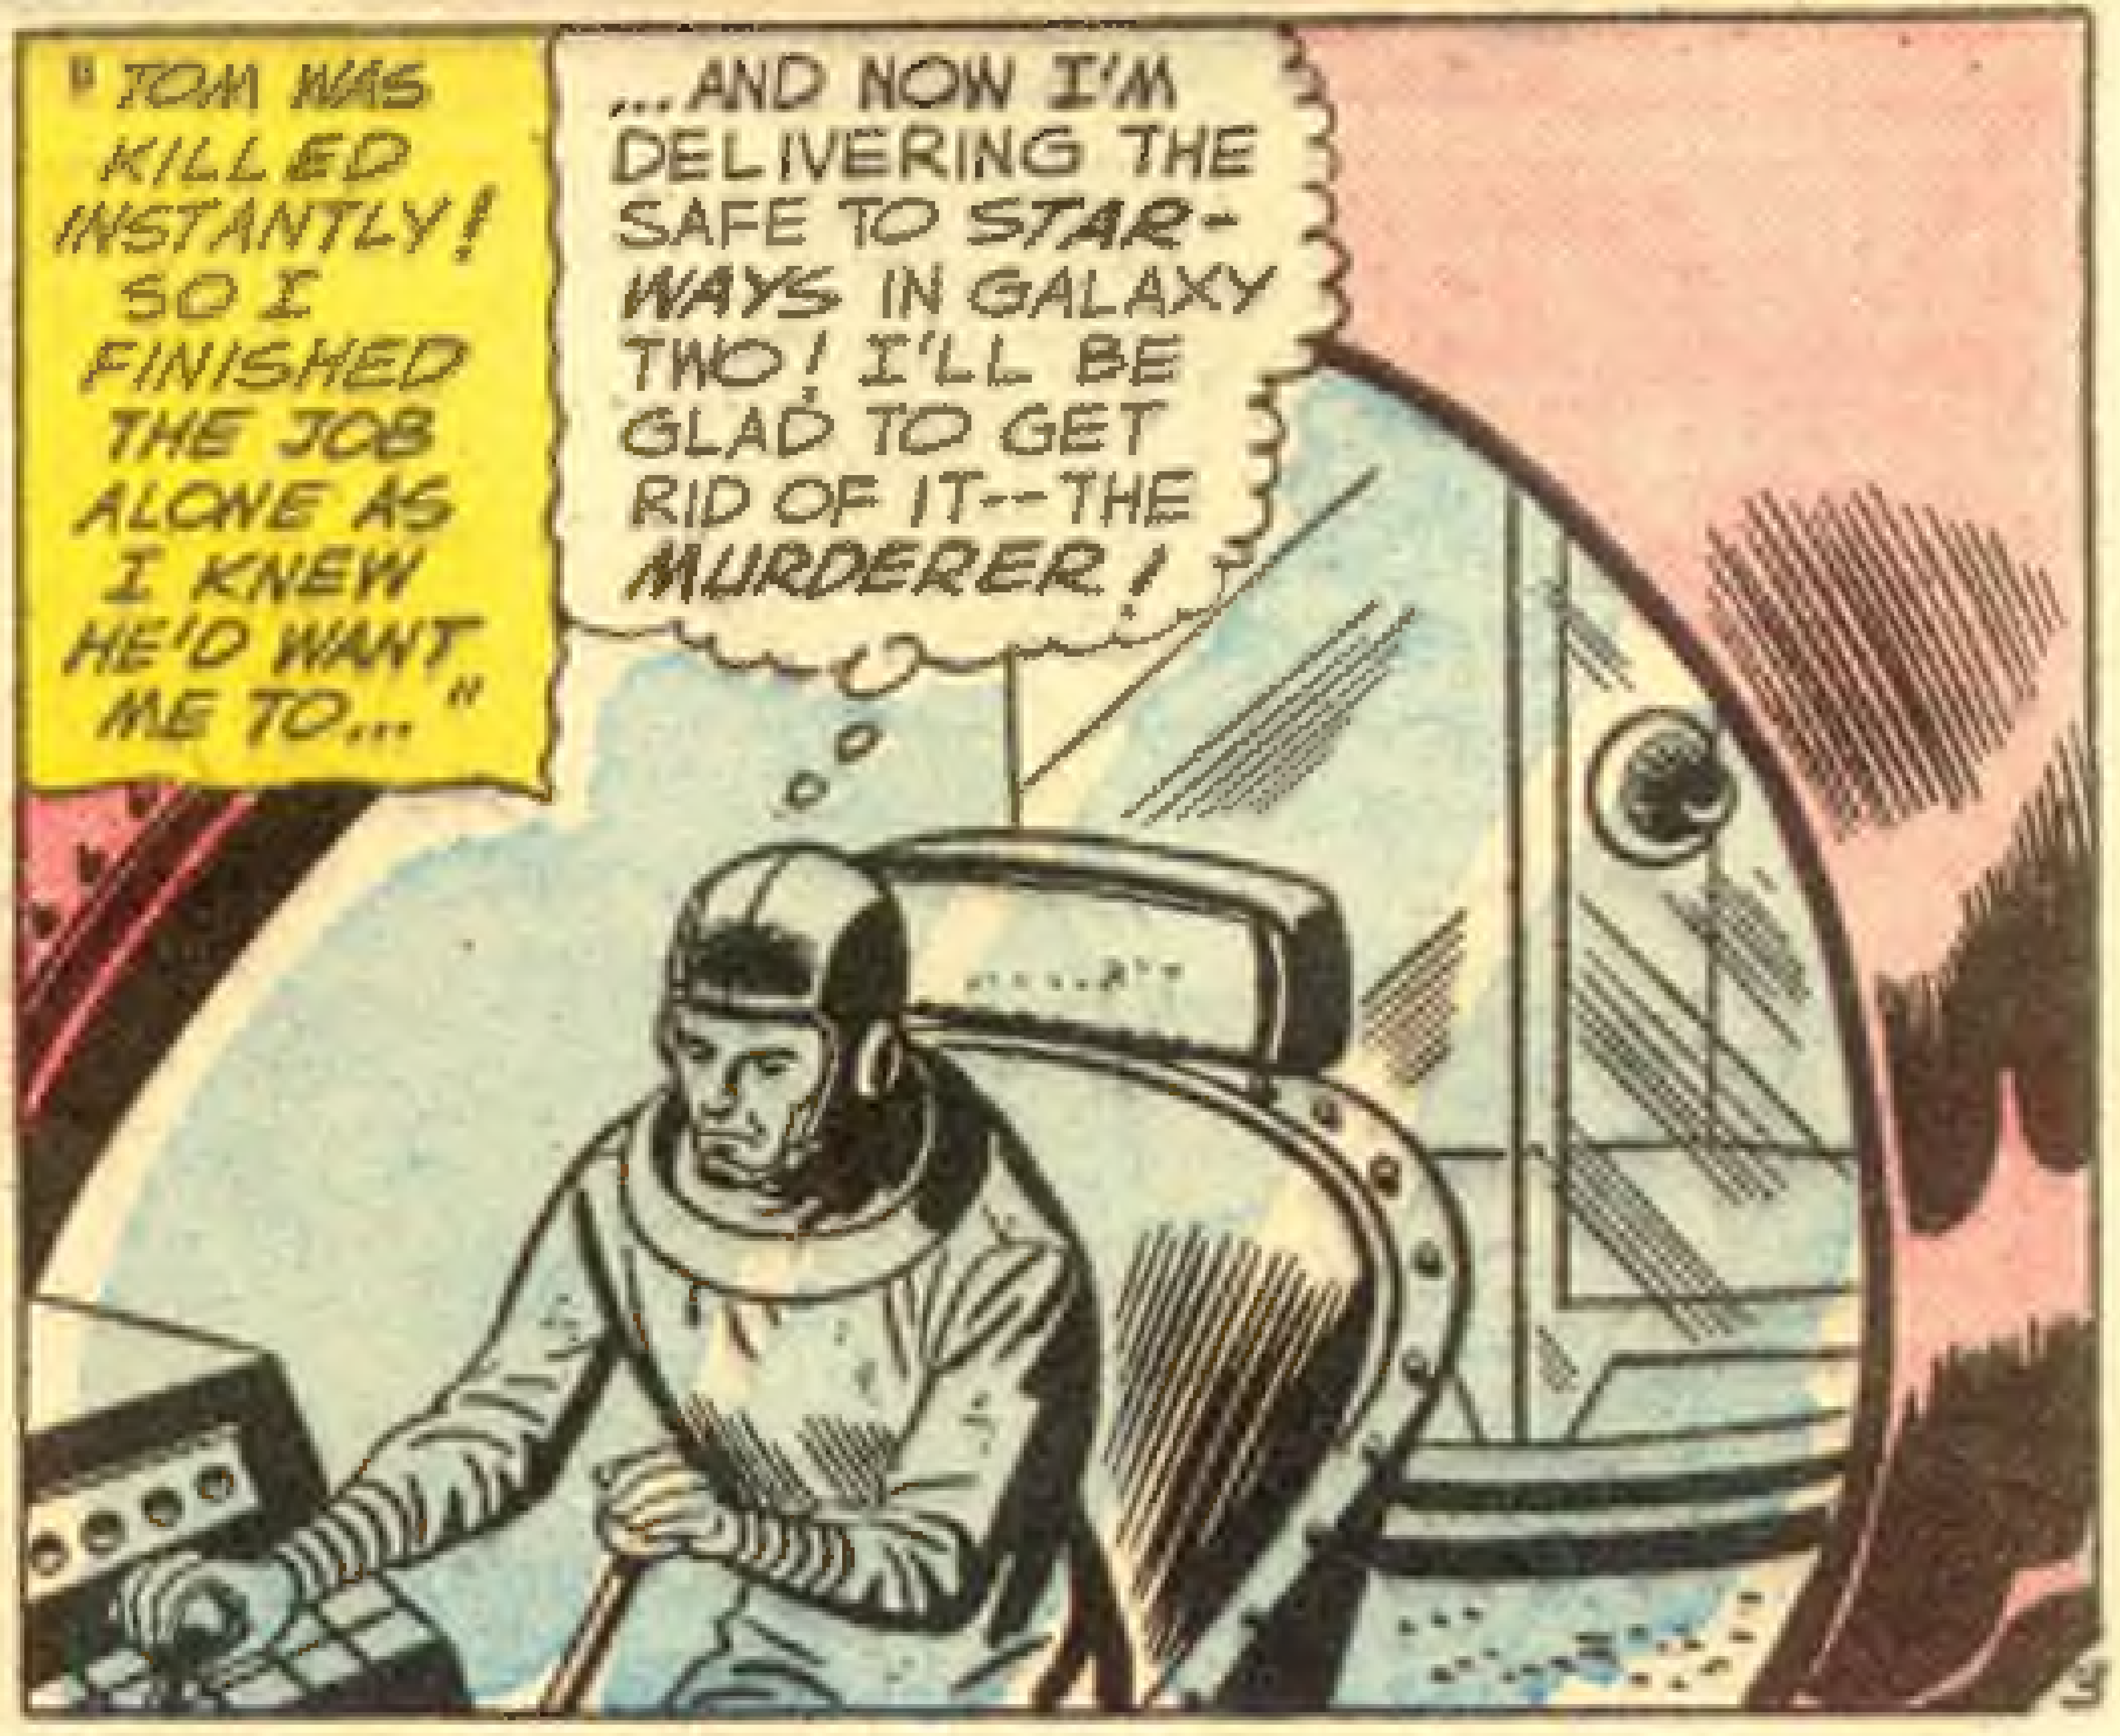
"YES, WE JOKED, BUT WITH TOM SHOWING THE WAY WE TOOK ON THE JOB !
STARWAYS INTENDS TO STORE BILLIONS OF DOLLARS WORTH OF NUCLEAR POWER UNITS IN THE SAFE, DAN! THAT'S WHY THE MATERIAL OF THE SAFE MUST BE IMPREGNABLE -- PROOF AGAINST ANY EXPLOSION!



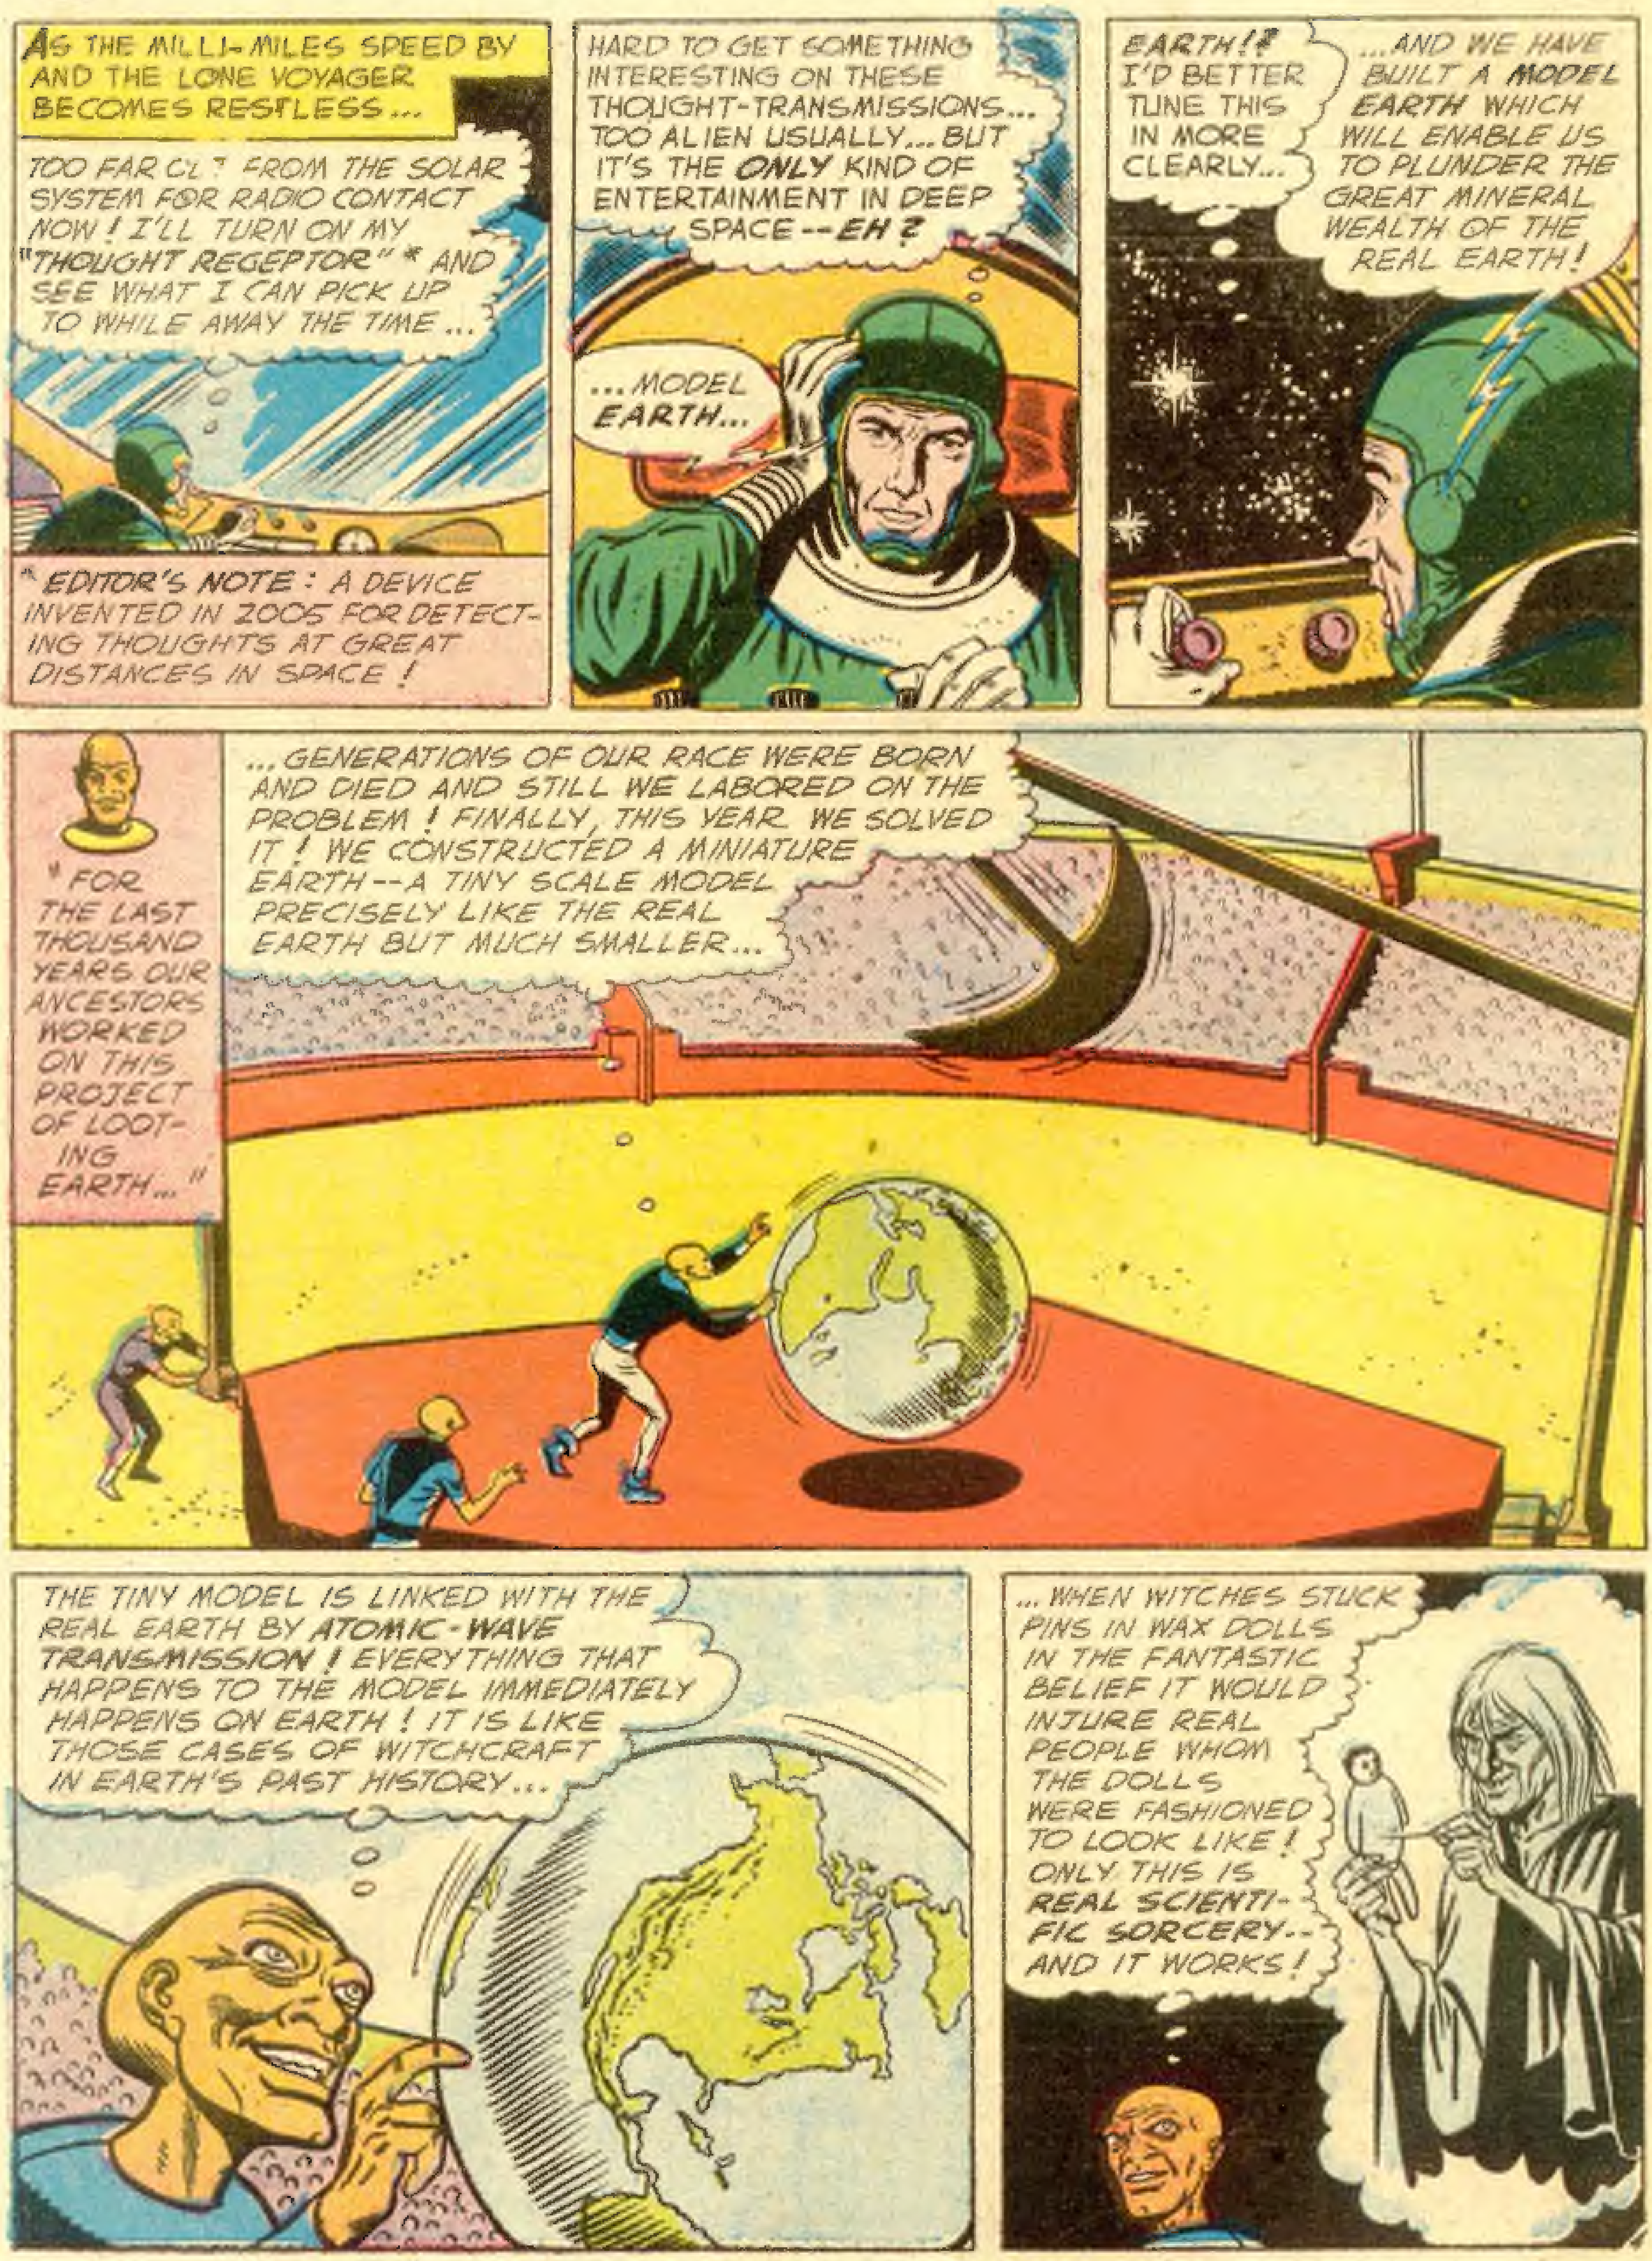
AND THE MATERIAL HAS TO BE TRANSPARENT BECAUSE THEY'VE GOT TO BE ABLE TO KEEP A CONSTANT CHECK ON THE CONTENTS ! AFTER ALL, NOBODY WANTS BILLIONS IN N.P.U.'s TO GO UP IN SMOKE !



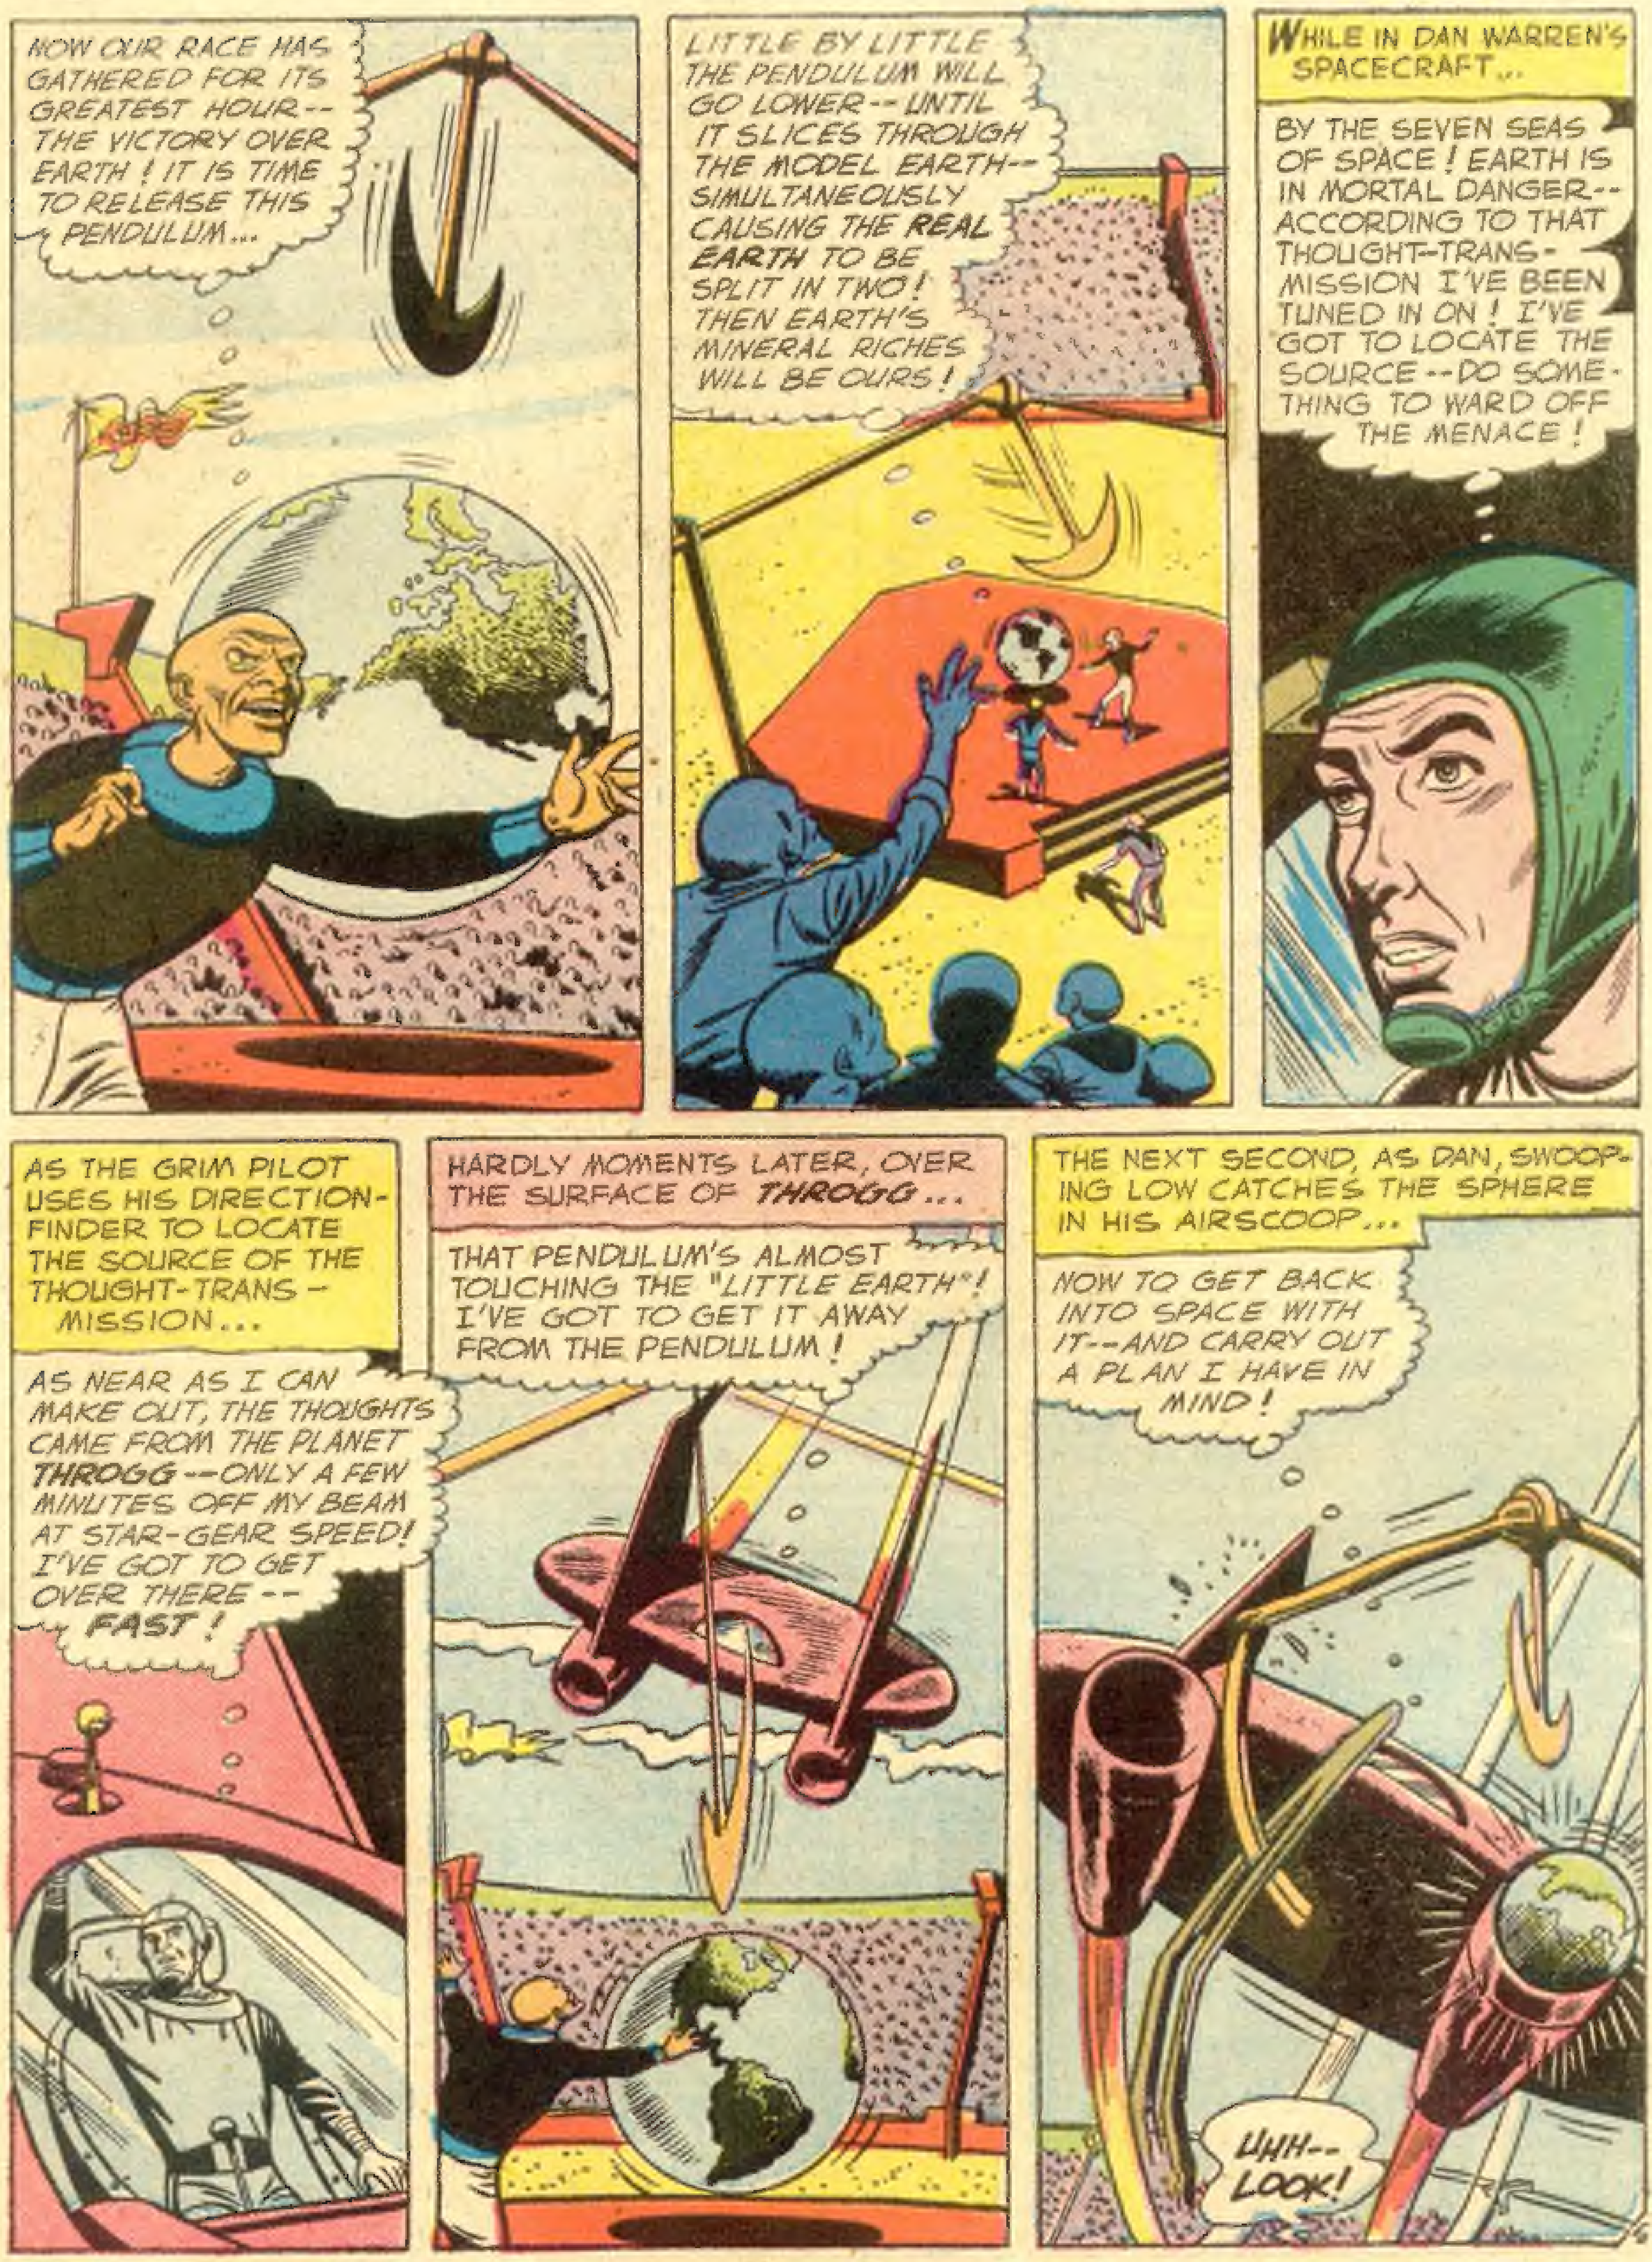
"FIVE YEARS OF HARD WORK FOLLOWED! WE WERE PRACTICALLY FINISHED WHEN THE TERRIBLE ACCIDENT HAPPENED..."
UHH--THE SAFE FELL FROM IT SPECIAL CRADLE--AS TOM WAS UNDER IT--IT CRUSHED HIM !
RRRRMMMM!



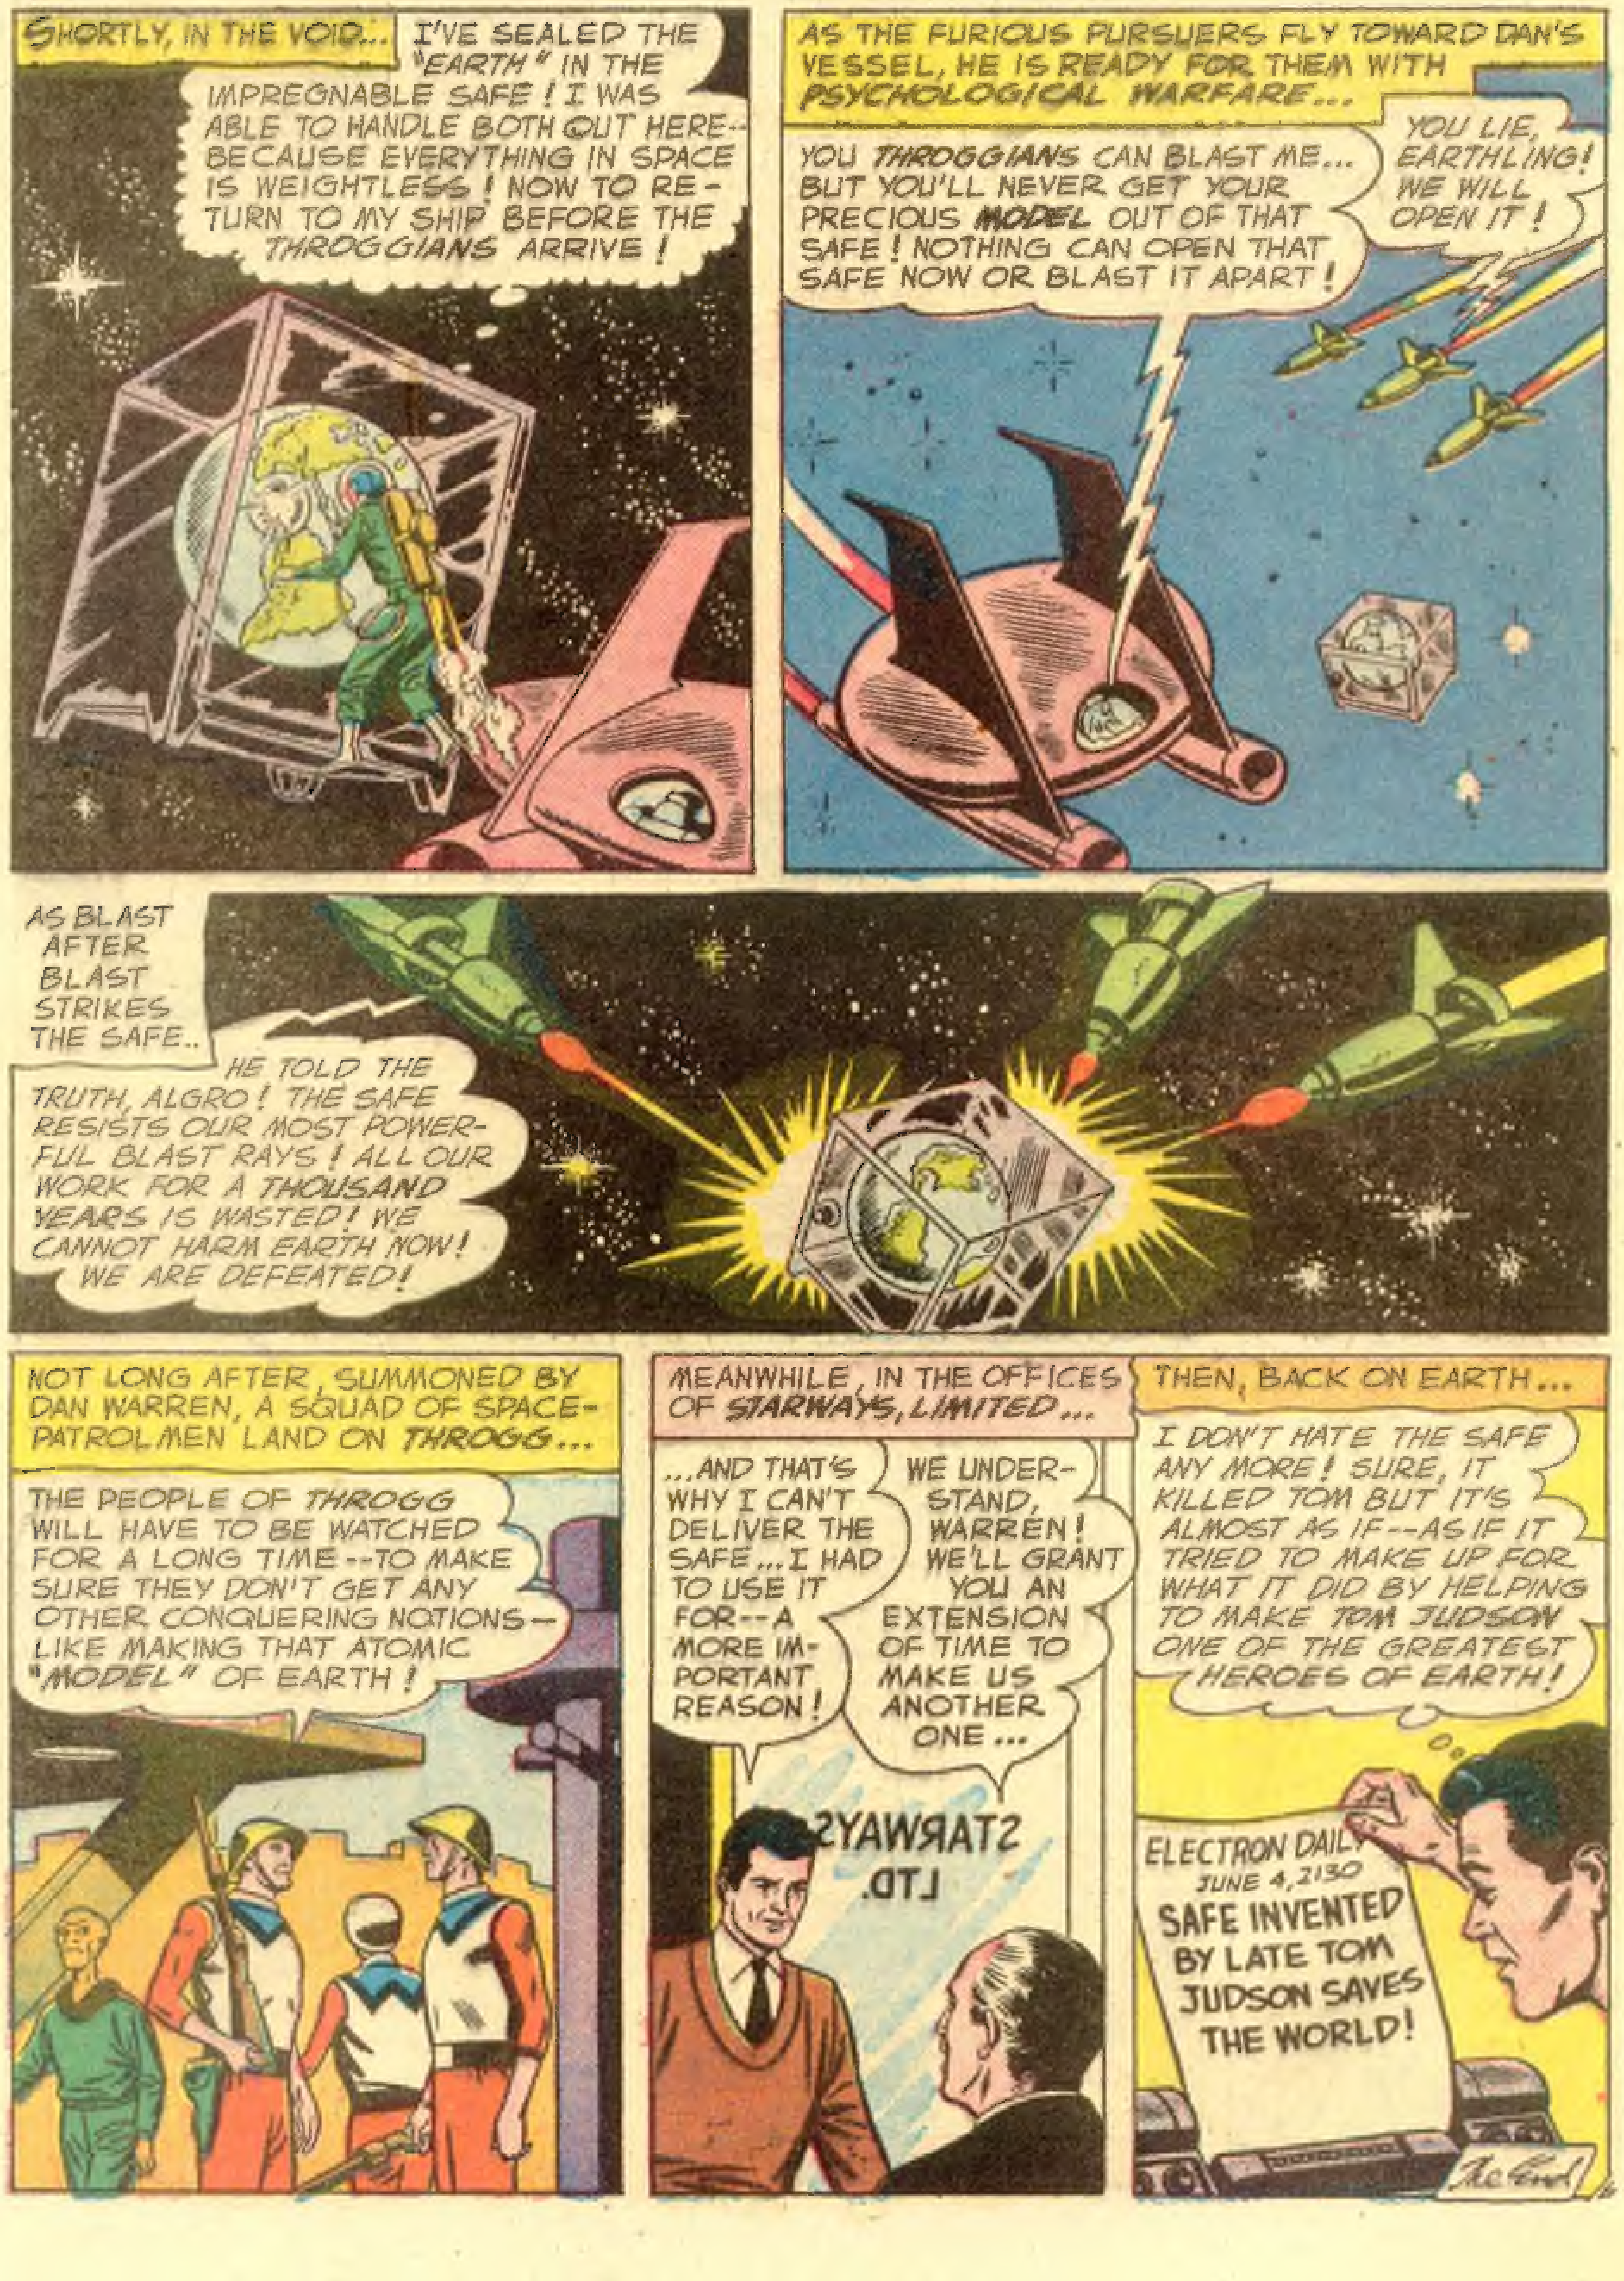
"TOM WAS KILLED INSTANTLY! SO I FINISHED THE JOB ALONE AS I KNEW HE'D WANT ME TO..."
...AND NOW I'M DELIVERING THE SAFE TO STARWAYS IN GALAXY TWO! I'LL BE GLAD TO GET RID OF IT--THE MURDERER !



AS THE MILLI-MILES SPEED BY AND THE LONE VOYAGER BECOMES RESTLESS ...
TOO FAR OUT FROM THE SOLAR SYSTEM FOR RADIO CONTACT NOW! I'LL TURN ON MY "THOUGHT RECEPTOR" * AND SEE WHAT I CAN PICK UP TO WHILE AWAY THE TIME ...
* EDITOR'S NOTE: A DEVICE INVENTED IN 2005 FOR DETECTING THOUGHTS AT GREAT DISTANCES IN SPACE!
HARD TO GET SOMETHING INTERESTING ON THESE THOUGHT-TRANSMISSIONS... TOO ALIEN USUALLY... BUT IT'S THE ONLY KIND OF ENTERTAINMENT IN DEEP SPACE -- EH?
... MODEL EARTH ...
EARTH!? I'D BETTER TUNE THIS IN MORE CLEARLY...
... AND WE HAVE BUILT A MODEL EARTH WHICH WILL ENABLE US TO PLUNDER THE GREAT MINERAL WEALTH OF THE REAL EARTH!
"FOR THE LAST THOUSAND YEARS OUR ANCESTORS WORKED ON THIS PROJECT OF LOOTING EARTH..."
... GENERATIONS OF OUR RACE WERE BORN AND DIED AND STILL WE LABORED ON THE PROBLEM! FINALLY, THIS YEAR WE SOLVED IT! WE CONSTRUCTED A MINIATURE EARTH -- A TINY SCALE MODEL PRECISELY LIKE THE REAL EARTH BUT MUCH SMALLER...
THE TINY MODEL IS LINKED WITH THE REAL EARTH BY ATOMIC-WAVE TRANSMISSION! EVERYTHING THAT HAPPENS TO THE MODEL IMMEDIATELY HAPPENS ON EARTH! IT IS LIKE THOSE CASES OF WITCHCRAFT IN EARTH'S PAST HISTORY...
... WHEN WITCHES STUCK PINS IN WAX DOLLS IN THE FANTASTIC BELIEF IT WOULD INJURE REAL PEOPLE WHOM THE DOLLS WERE FASHIONED TO LOOK LIKE! ONLY THIS IS REAL SCIENTIFIC SORCERY -- AND IT WORKS!



NOW OUR RACE HAS GATHERED FOR ITS GREATEST HOUR-- THE VICTORY OVER EARTH! IT IS TIME TO RELEASE THIS PENDULUM...
LITTLE BY LITTLE THE PENDULUM WILL GO LOWER-- UNTIL IT SLICES THROUGH THE MODEL EARTH-- SIMULTANEOUSLY CAUSING THE REAL EARTH TO BE SPLIT IN TWO! THEN EARTH'S MINERAL RICHES WILL BE OURS!
WHILE IN DAN WARREN'S SPACECRAFT...
BY THE SEVEN SEAS OF SPACE! EARTH IS IN MORTAL DANGER-- ACCORDING TO THAT THOUGHT-TRANSMISSION I'VE BEEN TUNED IN ON! I'VE GOT TO LOCATE THE SOURCE--DO SOMETHING TO WARD OFF THE MENACE!
AS THE GRIM PILOT USES HIS DIRECTION-FINDER TO LOCATE THE SOURCE OF THE THOUGHT-TRANSMISSION...
AS NEAR AS I CAN MAKE OUT, THE THOUGHTS CAME FROM THE PLANET THROGG --ONLY A FEW MINUTES OFF MY BEAM AT STAR-GEAR SPEED! I'VE GOT TO GET OVER THERE-- FAST!
HARDLY MOMENTS LATER, OVER THE SURFACE OF THROGG...
THAT PENDULUM'S ALMOST TOUCHING THE "LITTLE EARTH"! I'VE GOT TO GET IT AWAY FROM THE PENDULUM!
THE NEXT SECOND, AS DAN, SWOOPING LOW CATCHES THE SPHERE IN HIS AIRSCOOP...
NOW TO GET BACK INTO SPACE WITH IT--AND CARRY OUT A PLAN I HAVE IN MIND!
UHH-- LOOK!



SHORTLY, IN THE VOID...
I'VE SEALED THE "EARTH" IN THE IMPREGNABLE SAFE! I WAS ABLE TO HANDLE BOTH OUT HERE-- BECAUSE EVERYTHING IN SPACE IS WEIGHTLESS! NOW TO RETURN TO MY SHIP BEFORE THE THROGGIANS ARRIVE!
AS THE FURIOUS PURSUERS FLY TOWARD DAN'S VESSEL, HE IS READY FOR THEM WITH PSYCHOLOGICAL WARFARE...
YOU THROGGIANS CAN BLAST ME... BUT YOU'LL NEVER GET YOUR PRECIOUS MODEL OUT OF THAT SAFE! NOTHING CAN OPEN THAT SAFE NOW OR BLAST IT APART!
YOU LIE, EARTHLING! WE WILL OPEN IT!
AS BLAST AFTER BLAST STRIKES THE SAFE..
HE TOLD THE TRUTH, ALGRO! THE SAFE RESISTS OUR MOST POWERFUL BLAST RAYS! ALL OUR WORK FOR A THOUSAND YEARS IS WASTED! WE CANNOT HARM EARTH NOW! WE ARE DEFEATED!
NOT LONG AFTER, SUMMONED BY DAN WARREN, A SQUAD OF SPACE-PATROLMEN LAND ON THROGG...
THE PEOPLE OF THROGG WILL HAVE TO BE WATCHED FOR A LONG TIME--TO MAKE SURE THEY DON'T GET ANY OTHER CONQUERING NOTIONS-- LIKE MAKING THAT ATOMIC "MODEL" OF EARTH!
MEANWHILE, IN THE OFFICES OF STARWAYS, LIMITED...
...AND THAT'S WHY I CAN'T DELIVER THE SAFE... I HAD TO USE IT FOR--A MORE IMPORTANT REASON!
WE UNDERSTAND, WARREN! WE'LL GRANT YOU AN EXTENSION OF TIME TO MAKE US ANOTHER ONE...
STARWAYS LTD.
THEN, BACK ON EARTH...
I DON'T HATE THE SAFE ANY MORE! SURE, IT KILLED TOM BUT IT'S ALMOST AS IF--AS IF IT TRIED TO MAKE UP FOR WHAT IT DID BY HELPING TO MAKE TOM JUDSON ONE OF THE GREATEST HEROES OF EARTH!

MUSCLE IS DERIVED FROM THE LATIN **MUSCALUS**-- MEANING "LITTLE MOUSE"-- BECAUSE WHEN YOU WATCH THE PLAY OF MUSCLES IN AN ARM IT SUGGESTS THE PICTURE OF LITTLE MICE RUNNING UP AND DOWN UNDER THE SKIN.

GALAXY IS THE ENGLISH VERSION OF THE GREEK WORD **GALAXIAS,** IN WHICH **GALA** MEANS "MILK"-- SO NAMED BECAUSE THE STARS IN THAT PORTION OF THE SKY SEEM TO FORM A 'MILKY WAY'..

CLOUD COMES TO US FROM THE OLD ENGLISH WORD **CLŪD**-- MEANING A HILL. TO THE ANCIENTS A DISTANT HILL ON A MISTY DAY LOOKED LIKE A CLOUD, AND A CLOUD OFTEN LOOKED LIKE A MISTY HILL.

MYSTERIES of SPACE!

ALTHOUGH THE SUN WEIGHS 28 MILLION TIMES AS MUCH AS THE EARTH'S MOON, ITS DISTANCE FROM EARTH IS SO GREAT THAT ITS TIDE-RAISING FORCE IS ONLY ONE HALF THAT OF THE MOON. WHAT EFFECT WOULD THE SUN HAVE ON THE EARTH'S TIDES IF IT COULD BE CONDENSED TO A SIZE SMALL ENOUGH TO OCCUPY THE MOON'S PLACE?

THE MINIATURE SUN WOULD INCREASE THE EARTH'S TIDES **64 MILLION TIMES!**

ASSUMING THE SKY WERE DIVIDED INTO WINDOWS THE SIZE OF THE MOON HOW MANY ***GALAXIES*** COULD OUR MOST POWERFUL TEL[illegible]

THERE WOULD BE 1,000 GALAXIES IN EACH WINDOWPANE, WITH EACH GALAXY CONTAINING 200 TO 500 BILLION STARS!

COMET HUNTERS!

WITH the exception of the sun and the earth's moon, comets are frequently the most conspicuous of all celestial bodies. Probably the most famous of all comets is Halley's Comet. This brilliant and beautiful "long-haired star" (as ancient astronomers fancied this object to be) was last visible in 1910 and will not be seen again till 1986.

Since the invention of the telescope more than 300 years ago, about a thousand comets have been observed and recorded. The eminent German astronomer Johann Kepler (1571-1630) theorized that comets were as numerous as the fish in the sea; currently astronomers believe comets number in the hundreds of thousands. Every year from 3 to 11 comets are detected, of which approximately one-third are identified as return visits of previously discovered comets.

With all this preponderance of comets it seems a curious fact that many people grow to adult life without ever having seen a single comet. No one knows when a new, unheralded comet may suddenly sweep across the night sky. Though astronomers discover a few each year with the aid of a telescope, most comets are beyond the range of vision of the naked human eye. No one with unaided vision can hope to see 8 or 10 in a [illegible] past experience, only 2 or 3 of these celestial visitors will be of great enough size and brilliance to be seen.

At this point the reader is probably curious to know why it is that a brilliant comet is apt to appear in the sky without any forewarning, especially in view of the large number of telescopes now in use in all parts of the world.

The explanation is quite simple. If a comet in the northern hemisphere were to approach us from a direction some distance from the sun's position at any given season, astronomers would be able to "pick it up" with their comet finders, or with their telescopes, months before it could be seen with the naked eye. But comets approach the sun from all directions, and astronomers have no advantage over ordinary laymen in cases where a comet has been hidden either by the body of the sun or its blinding rays. A comet may suddenly emerge into visibility, in full splendor, at any moment, if it has been approaching us in a direction in line—or almost in line—with the earth and the sun.

Readers hoping to spot a comet should give at least one glance sunward every clear evening or morning, just after sunset or sunrise. In the very year of the last appearance of Halley's Comet an unexpected and more luminous comet was discovered, not by as-[illegible] railroad in South Africa! It was so bright it could even be seen in the daytime.

Some of the greatest comets were first spotted by laymen. An observant boy or girl might be the discoverer of a comet, even without optical aid; and if the discovery were promptly telegraphed to the Harvard Observatory, Cambridge, Mass., the comet reported would be named after the person who sent in the first telegram, reporting its position.

J. L. Pons (1741-1831), the most successful of all comet hunters, discoverer of 30 comets in the first 25 years of the 19th century, was a doorkeeper at the observatory of Marseilles, France. He became more "famous" than Professor Thulis, the director of the observatory at the time, who taught and encouraged Pons in his comet-hunting endeavors.

Comet hunting affords an admirable opportunity for the amateur astronomer who has or can obtain the use of a fair-sized small telescope, a clear sky and an enormous amount of patience. Hunting comets is a slow sport, but a year or two of conscientious work is apt to be well rewarded.

To quote Professor H. N. Russell on the procedure for comet hunters to take, "he should provide himself with an eyepiece of low power and large field of view. He then goes out on a clear night, points his telescope anywhere in the sky, and sweeps slowly across the heavens, watching the stars as they pass through his field of view. When he has gone as far as he plans to go, he shifts his instrument laterally and sweeps back again, covering another long and narrow strip of sky, overlapping the first along one edge. Then he makes another shift sidewise and returns, sweeping out a third strip, and so on, as long as his patience will allow.

"All through his search he is keeping watch for objects which are not star-like in appearance—faint hazy spots or lumps of light. If he finds one, the chances are that it is one of the many nebulae which are bright enough to be seen in small telescopes

"Sooner or later, if he does not become discouraged, such an observer will come upon some faint nebulous object which is not in the catalogue of nebulae. He will then watch this with care, aligning it with stars in the field of view, to see if it is in motion. If it moves it certainly is a comet and his next duty is to determine its position in the sky as closely as the time and means at his disposal permit, and then send a telegram to the central station established by astronomers—in this country, the Harvard College Observatory—announcing his discovery, and giving details regarding the comet's position, motion and brightness. The news will then be broadcast and other astronomers will get to work.

"Though the labors of the comet seeker may be long, his rewards are considerable. Should he discover an 'unexpected' comet (as opposed to one whose return has been predicted), the comet will then be known by his name and he will receive one of the medals which are regularly awarded for such discoveries by the Astronomical Society of the Pacific. There is a fair chance, too, that the comet may turn out to be of some unusual interest; it may be periodic, or may come near the sun or earth, and be conspicuous to the naked eye. In such case, the name of the discoverer bids fair to be long remembered in the annals of discovery. But more satisfying than these claims to fame must be the consciousness of the discoverer that he has made a definite addition to the sum of human knowledge."

For the benefit of those who have never seen a comet, it has no evident motion and shines in the sky as calmly as the moon. It is a distant and vastly large object, always larger than the earth, and sometimes as large as the sun. A comet should not be confused with a meteor or so-called "shooting star"—for a meteor is very small and flashes across the sky in an instant, whereas a comet stays in view for hours, days, or even weeks.

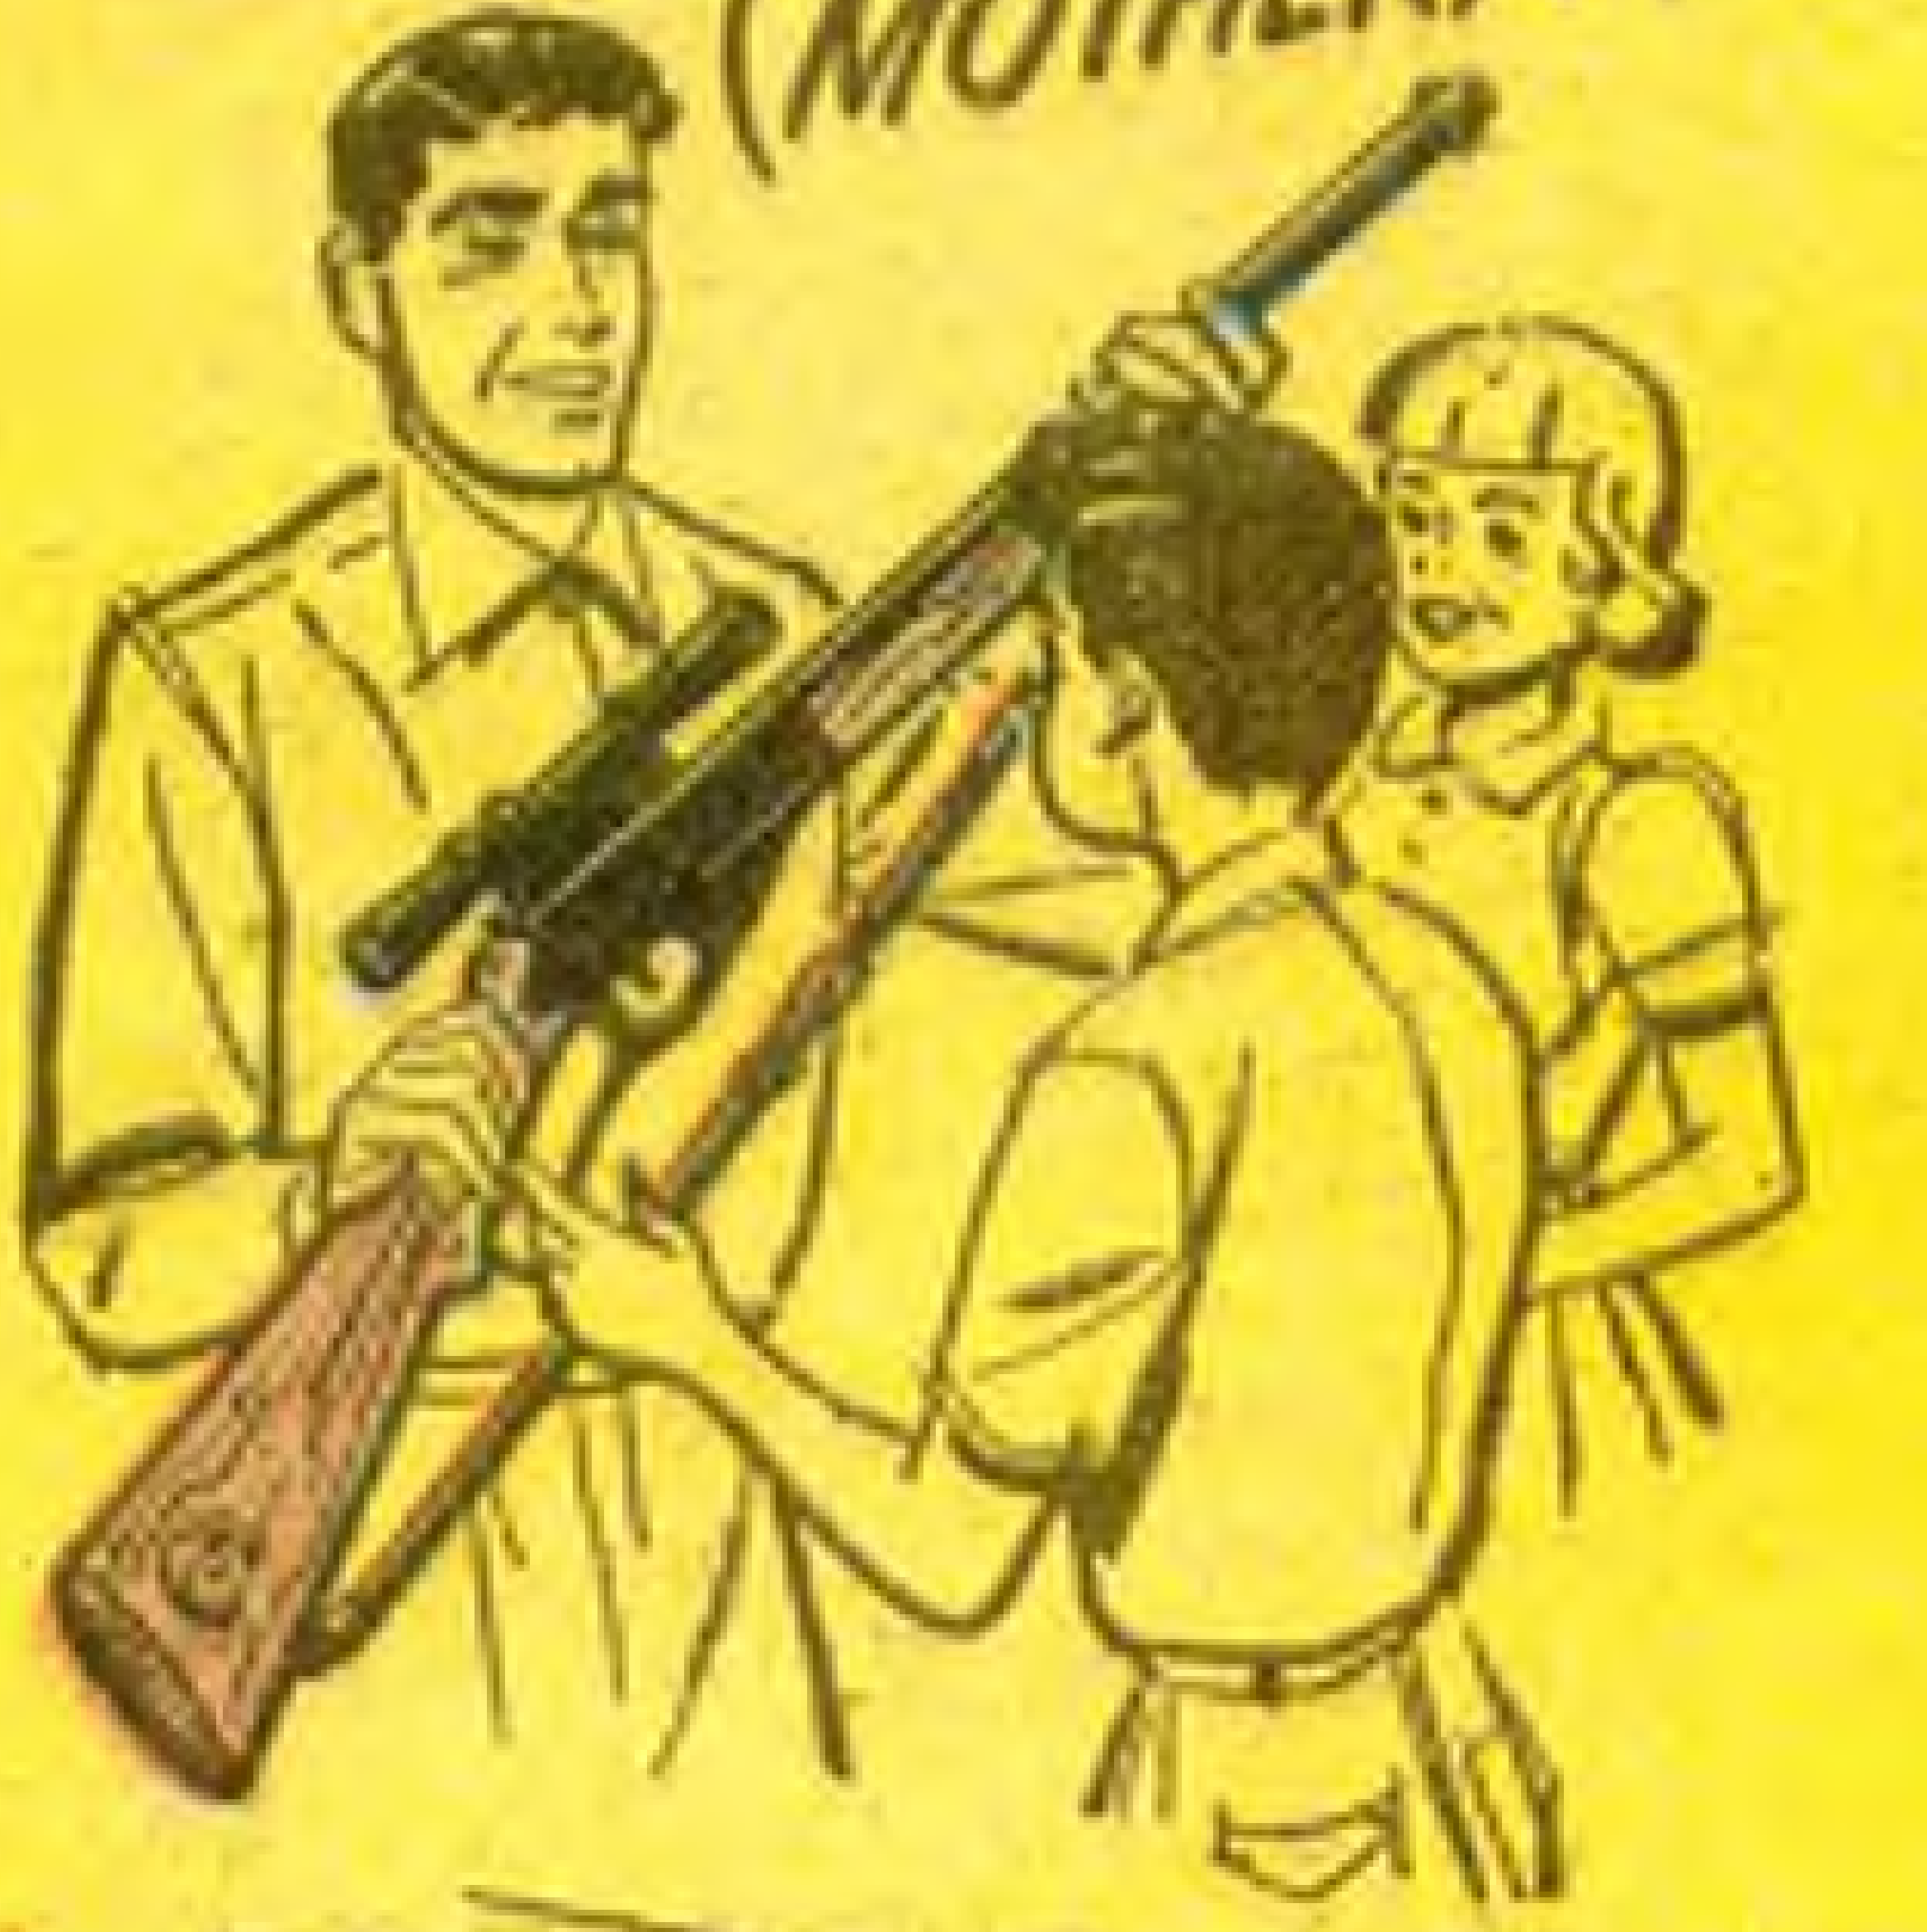
DAD (MOTHER, TOO)



Read why DAISY is the RIGHT GUN

For EARLY TRAINING and FUN . . .

Since 1888 Daisy Air Rifles have used the same safer spring-type action—the safer short range—the safer low "factory limited" power! *Today* Daisys are approved for the marksmanship programs of National Rifle Association, the Boy Scouts of America. *Today* Daisys are used in schools, camps, air rifle clubs and homes to teach proper gun handling faster, more safely, more economically. Daisy is the accepted "first" gun.

Many Dads enjoy using the Daisy for inexpensive home target practice. Daisy shooting is also F-U-N for the whole family—from seven to seventy years old!

Buy your junior a Daisy and teach safety through skill. See Daisy Air Rifles on display today at your favorite hardware, sports goods or department store. Mail coupon now for instructive, free Daisy literature!

OTHER DAISY TRAINING ADVANTAGES

It's easy and fun to train juniors with a famous Daisy because: (**1**) the official NRA spring-type range is only 15 feet—shorter than your auto; a garage or 20′ room will do; (**2**) store cartons filled up with old magazines make a safe backstop; (**3**) a Daisy costs as little as $5.95; (**4**) ammunition costs only 5¢ for about 125 shots.

GUN BOOK: Gun Section pictures America's most famous historical rifles and pistols each described by gun collector authority. Also explains how a Daisy works. Lists NRA Qualification Course for BB guns, shows NRA BB gun medals!

CLUB BROCHURE: Big 20-page Book tells how to organize, conduct a junior air rifle club; explains how parents, children, communities benefit from this popular new 15 foot spring-type air rifle marksmanship program. Write now!

IMPORTANT! Because Daisys are often confused with other type air rifles, we emphasize: Daisy is NOT a high-power pneumatic, gas, pellet or compressed air gun. It cannot be "pumped up" to increase power. It has always been a spring-action, short range, low power, low-priced BB gun—best for training boys and girls seven through fourteen.

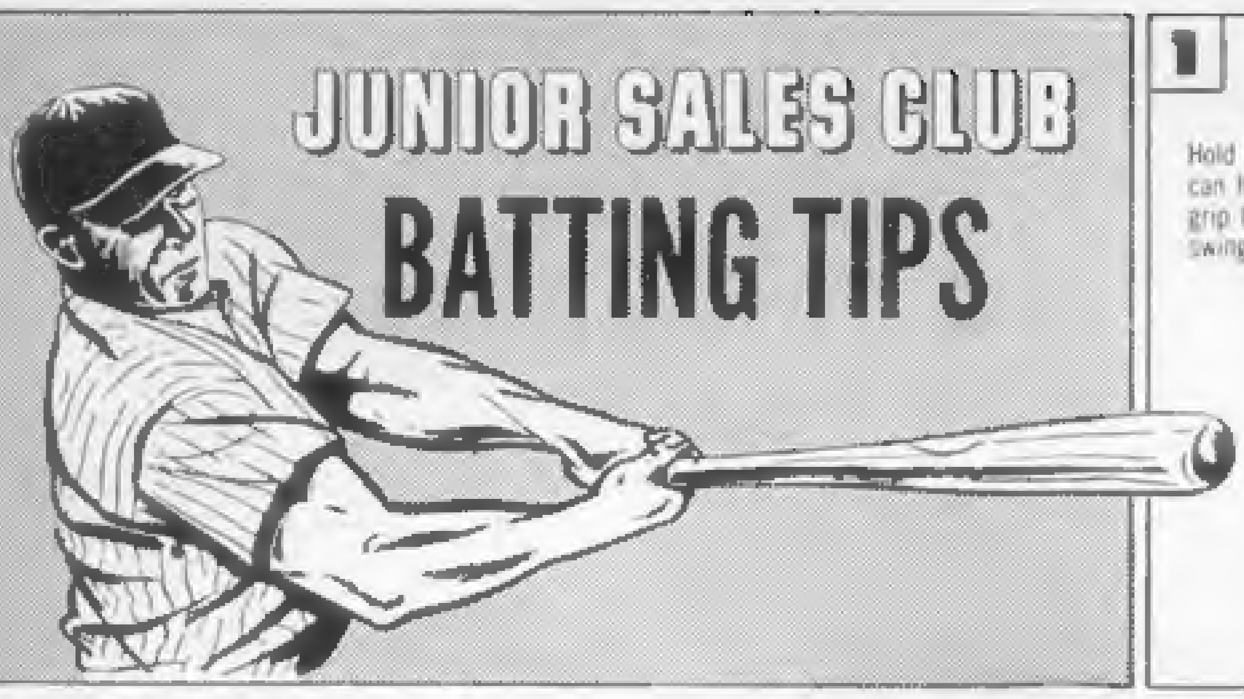
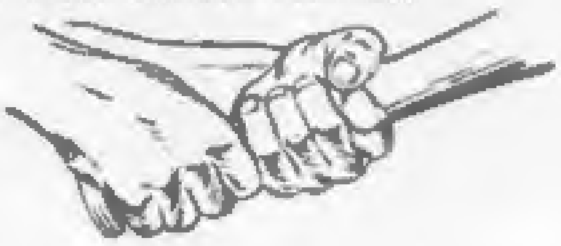
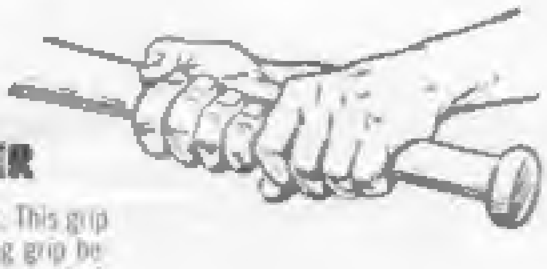
BATTING TIPS



1 CORRECT GRIP FOR SWING HITTER

Hold your bat at the end. You can hit a longer ball with this grip because you have a fuller swing and follow-through.



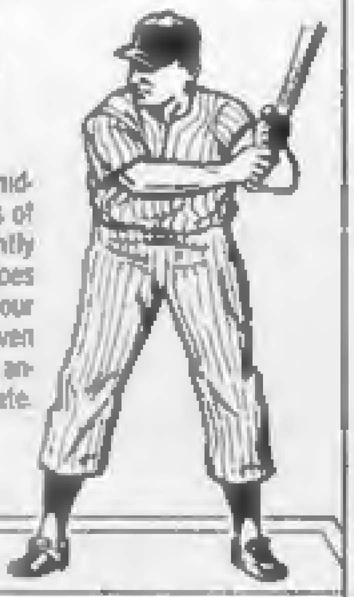


CORRECT GRIP FOR CHOKE HITTER

Hold the bat several inches up the handle. This grip doesn't drive the ball as far as the swing grip because the swing is not as full, gives more control, allows you to place hits better.

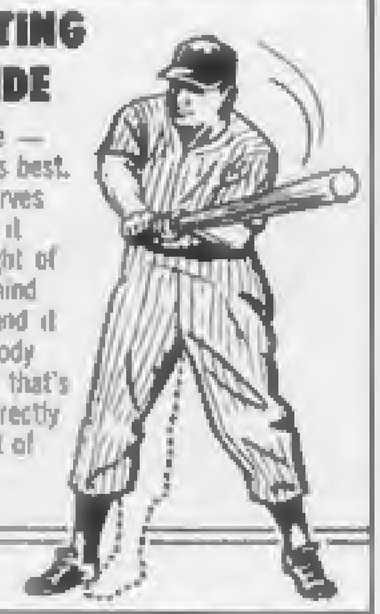
2 CORRECT BATTING STANCE

Place your rear foot midway between the sides of the batter's box, slightly behind home plate, toes facing the plate. Your front foot should be even with the plate, toes angled toward front of plate.



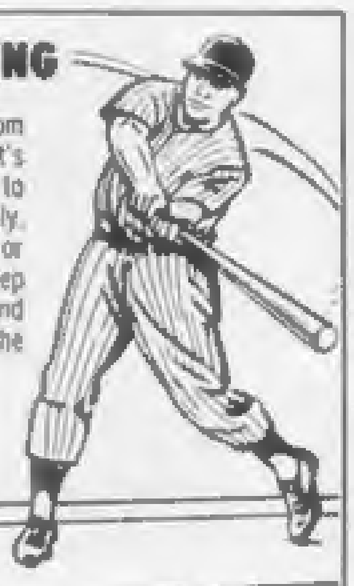
3 BATTING STRIDE

A short stride — about 6" — is best. The stride serves two purposes: it puts the weight of your body behind your swing, and it directs your body toward a ball that's not coming directly over the heart of the plate.



4 THE SWING

Hold the bat away from your body. Swing so it's level with the ground to meet the ball squarely. Never swing upwards or downwards. Always keep your eye on the ball and snap your wrists at the moment of impact.



5 COMPLETE FOLLOW-THROUGH

Your power and control come from your wrists. Complete follow-through gives ball more speed and distance. Remember, practice makes perfect!
